ACKNOWLEDGEMENTS

Research is a collective effort and it is hard to believe that only one person’s endurance is responsible for the success of any work. First and always, from the depth of my heart, I express my deep sincere gratitude to the Almighty Lord Gayatri for the blessings bestowed upon me to complete this work.

I would not have been able to complete this journey without the blessings and brilliance of countless people who have made significant contributions of love, intellect and time.

I am deeply grateful to Dr. H.N. Shah, my Supervisor and Principal, Merchant Institute of Technology for suggesting, formulating and guiding this research theme, for his sole contribution to the various theme published from this work and deep involvement in the planning and analysis of the work. Without his support, encouragement, persuasion and insight, it was almost impossible to complete my research. I deem it as my privilege to work under his able guidance.

I am also extremely indebted to Mr. Nilesh Patel, Purchase Manager Oerlikon Balzers Coating India Pvt. Ltd., Mr. Bhadresh Mistry, Advance Tool Technology and staff of MRC, MNIT Jaipur for helping in procuring PVD coating samples apart from their busy schedule. I am thankful to Mr. Ragesh Bateriwala, Keepsake Consultancy Pvt. Ltd. for providing HVOF deposition facility and his constant encouragement throughout the work.

I am thankful to Dr. Bharti Rehani, Associate Professor, Faculty of Technology, MS University, Vadodara for her valuable suggestions and for providing the laboratory facilities for analysis of XRD.

I gratefully acknowledge the valuable cooperation extended by Professors of Mechanical Department, CSPIT, CHARUSAT, Changa and SICART Laboratory for support in sample testing. Shri. N. B. Patel, Lab Assistant, L D
College of Engineering deserves commandments and sincere thanks for his devoted help in the experimental work.

I express my gratitude to Dr. Atindra Shukla, Dr. Bhavesh Bhartiya and the whole team of Shah-Schulman Center for Surface Science and Nanotechnology, DDIT, Nadiad for their kind cooperation and help in AFM training.

I expressed my sincere thanks to Dr. M. G. Bhatt, Dr. D. P. Vakharia, Dr. Ajit Shukla, Dr. G. D. Acharya and Dr. R. L. Jhala for their valuable suggestions and constant encouragement throughout the work as well as at the final stage of the work.

I also express my highest gratitude to the academic and non-academic staff members of RK University, who have ever been supportive especially Dr. Ajit Shukla, Director, Faculty of Technology, Dr. Nikhil Gokhale, Associate Director, Ph.D., Dr. Kartik Kothari, Head of Mechanical Department and Shri. Vimal Bhatt, Ph.D. Section. I also feel glad in giving the acknowledgement to each and everyone involved in assisting this research work.

I express my gratitude to all the research colleagues who have left their long lasting happy memories, their kind feelings and generous gestures.
Prof. Almas Juneja, Prof. Krishna Parmar, Dr. Shalvi Dave, Prof. Naresh Chauhan and other friends and family members deserve sincere thanks and gratitude for their moral support and motivation throughout the work.

Dedicated to My Family........
What to say and where to start, there aren’t enough words to express the feelings of my heart.

I thank my mother Smt. Menaben Patel and father Late Shri. V. G. Patel, who have taught me to live meaningfully and profoundly, for always being there for me and for their prayers at each step of my way. At this point, I recognize the impact of my father in law late Dr. D. J. Bhatt in my life and he is the one who
has given me the dream of pursuing research to this level. I thank my mother in law late Smt. Shrideviben Bhatt, my sisters, brother in laws and brother for touching my life and giving me unequivocal support throughout, as always, for which my mere expression of thanks likewise does not suffice.

Finally, but immensely I thank my husband Shri. Mandar Bhatt, my best friend and my soul mate from the bottom of my heart, for bearing all the inconvenience as a part of the game known as LIFE. I can say, you are with me and without you, I could not move forward an inch as you are an integral part of my life, now it’s time for you to accept my heartfelt thanks.

Special thanks to my son, Maurya for being the joy of my life and who has given me love, affection and warmth during my entire research work. Thank you for your patience, understanding and stimulation.

BHATT PINA MANDAR
