CONTENTS

I. INTRODUCTION .................................................. 1 - 4

II. REVIEW OF LITERATURE ....................................... 5 - 46

1. Historical ..................................................... 5

2. Chemistry of bioflavonoids ................................... 7

3. Vitamin P activity ............................................ 8

4. Effects of bioflavonoids on capillary permeability and capillary resistance .......................................... 13

5. Anti-inflammatory activity of bioflavonoids .............. 18

6. Bioflavonoids and gastric ulcers ............................. 23

7. Diabetic cataracts and bioflavonoids ......................... 25

8. Cardiovascular effects of bioflavonoids .................... 28

9. Bioflavonoids and blood cells ................................ 29

10. Bioflavonoids and liver ...................................... 30

11. Bioflavonoids in retinopathy and lathyris .................. 32

12. Bioflavonoids in frostbite ................................... 33

13. Biochemical effects of bioflavonoids ....................... 33
14. Mechanism of action of bioflavonoids ... 36
15. Flavonoid receptor ... 42
16. Therapeutic uses of bioflavonoids ... 43
17. Side effects and toxicity ... 45
18. Aim of this study ... 45

III. PLAN OF WORK ... 47 - 55

IV. MATERIALS AND METHODS ... 56 - 86
1. Bioflavonoids used for pharmacological studies ... 56
2. Statistical analysis and calculations ... 57
3. Anti-inflammatory studies ... 58
4. Acute toxicity studies ... 69
5. Studies on vascular permeability ... 69
6. Antigastic ulcer studies ... 73
7. Studies on galactosemic cataracts ... 79

V. OBSERVATIONS AND RESULTS ... 87 - 121
1. Anti-inflammatory studies ... 87
2. Studies on vascular permeability ... 98
3. Antigastic ulcer studies ... 112
4. Studies on galactosemic cataracts ... 119
VI. DISCUSSION

1. Anti-inflammatory studies ... 122
2. Studies on vascular permeability ... 138
3. Antigastric ulcer studies ... 148
4. Studies on galactosemic cataracts ... 160

VII. SUMMARY AND CONCLUSIONS ... 169 - 177

VIII. BIBLIOGRAPHY ... 178 - 196

IX. APPENDIX I
(Sources of drugs and chemicals) ... 197 - 198

X. APPENDIX II
(List of publications and papers presented in the conferences and symposium based upon this work) ... 199 - 200
