ACKNOWLEDGEMENTS

I deem it a great pleasure to express my long conceived, well nourished sense of gratitude to my teacher, Professor and guide, Dr. S. Subramanian, M.D., D. Bact. (London), F A. M S., Professor and Head, Department of Microbiology, Postgraduate Institute of Basic Medical Sciences, Taramani, Madras-42 for shaping me as a research worker, for introducing me to this fascinating field of hepatovirology and for guiding me by constructive criticism and constant encouragement through out the period of my research.

It is my pleasant duty to thank my co-guide, Dr. S. Gnanesikan, M.D., Director of Medical Education, Madras-5 for his courteous participation in the doctoral committee and continued encouragement.

I am extremely thankful to Dr. N. Madanagopalan, M.D., F. R. C. P. (E), F. A. M. S., Professor of Gastroenterology, Madras Medical College, Madras-3 who has periodically boosted up my research with materials and participation in the doctoral committee to this stage of completion by bewildering enthusiasm and befitting encouragement.

I thank Dr. C. S. Lakshminarayana, M.Sc., M.D., Director and Professor, Institute of Microbiology and Dr. Sivarajan, M.D., Dean, Madras Medical College, Madras- 3 for extending all the available facilities to complete this work. My thanks are due to Dr. K. V. Murthy, M.D., Director, King Institute of Preventive Medicine, Guindy, Madras-32 for his courtesy and non - stop informations on HBV literature and to Dr. K. Thamizharasi, M.D., for procuring the same.

I am thankful to Dr. (Mrs) Suniti Solomon, M.D., Associate Professor of Microbiology, Dr. (Mrs) Panchanatham, M.D., Associate Professor of Pathology and Mr. K. Thiruneelakantan, M.Sc., Assistant Professor of Microbiology, Madras Medical College, Madras-3 for their valuable help rendered in the immunological, histopathological and biochemical aspects of this study respectively.

My thanks are of no measures to Dr. B. S. Blumberg, M.D., Ph. D., Associate Director for Clinical Research, Institute for Cancer Research, Philadelphia, USA., Prof. J. L. Melnick, Department of Virology, Baylor University College of Medicine, Texas, USA; Dr. Herdis Von Magnus, M.D., Director, WHO collaborating centre for Virus Reference and Research, State Serum Institute, Copenhagen, Denmark and Dr. O. Sobeslavsky, Medical Officer, Virus Diseases, WHO, Geneva for the supply of the WHO reference Hepatitis B antiserum; and to Prof. E. S. Ketiladze, M.D., Ph.D., Head, Clinical Virology and Hepatitis Department, Ivanovskij Institute of Virology, Moscow for the gift of control HBsAg and antiHBs and Indian Council of Medical Research for the continued supply of commercial antiHBs.
The kind courtesy of Dr. A. M. Couroucé, Ph. D., Centre National de Transfusion Sanguine, Paris and Mrs. Sylvia Cunningham, Research Resources Branch, National Institute of Health, Bethesda, Maryland in supplying the HBsAg subtyping reagents and HBe system reagents and Dr. Yozo Matsubara, Associate Director, Fujizoki Pharmaceutical Co. Ltd., Tokyo, Japan for the supply of RPHA kits are gratefully acknowledged.

I am immensely thankful to Dr. N. C. Nayak, M. D., Professor of Pathology, All India Institute of Medical Sciences, New Delhi-16 for processing the coded sera for liver cell membrane antibodies, and to Mr. R. Jayasubramanian, M.Sc., Research Scholar, A. C. College of Technology, Madras for getting the spectral analysis of the antiviral principle done.

I profusely thank Dr. Solomon Victor, M. S., M. S., F. R. C. S., F. R. C. P., Professor of Open Heart surgery, Madras Medical College, Madras-3 for organising the study of HBsAg in Open Heart surgery.

My sincere thanks are due to Dr. C. S. Baskaran, M.D., M.R.C. (Path), F. A. M. S., then as Professor of Microbiology, S. V. Medical College, Tirupathi; Dr. T. Prabhu, M D., Professor of Microbiology, Bangalore Medical College, Bangalore, Dr. J. Shanmugam, M.Sc., Ph. D. (Moscow), Head, Department of Microbiology, Sree Chitra Tirunal Medical Centre, Trivandrum and to all my friends, colleagues and Professors of the various Blood Banks, hospitals and medical colleges of the State of Tamilnadu for their readiness in sending sera for hepatitis B serology.

The valuable help in the statistical evaluation rendered by Mr. M. Palanisamy, M.Sc., and Mr. N. Thyagarajan, M.Sc., Govt. Women and Children Hospital, Madras-8 is acknowledged.

I thank all the staff members of the Institute of Microbiology and Department of Gastroenterology, Madras Medical College, Madras-3 for their co-operation and coordination in the completion of this research.

Last but not the least, I am thankful to Mr. A. Ganesan, M.Sc., Assistant Professor of Biology, Madras Medical College, Madras-3 for his photographic assistance and compilation help.
