ACKNOWLEDGEMENTS

Small Scale Industry, has been a driving force for the development of the pyramid of Indian Economy. But such units, especially those located in the Industrial Estates of Tamil Nadu, face plethora of problems. This prompted me precisely to take up a research study of this magnitude so that the problems faced by such small units can be scientifically analysed and suitable suggestions can be evolved to overcome them. This would in turn make them contribute for the furtherance of economic development of Tamil Nadu most effectively.

I am fortunate that I could do this work in the Department of Commerce, Madras University, P.G. Extension Centre, Salem. I wish to express my gratitude to Madras University, my alma mater, for bestowing upon me an opportunity to undertake this doctoral programme on part time basis.
