Acknowledgements

This study was carried out at molecular biology unit lab no.3 NCCS, Pune, India.
First of all I would like to thank Padmashree Dr. G.C. Mishra and Dr. Shekhar C.
Mande, Director, NCCS, Pune for providing me this unique educational opportunity
to carry out my research work at NCCS.
I take this opportunity to thank DBT Department of biotechnology, New Delhi,
India for providing me fellowship during this tenure.
I have no words to express my deep gratitude and sincere thanks to my research
guide Dr. Yogesh S. Shouche, who has always filled positive energy in me with his
constant encouragement in my research work. His helping nature during all the
phases of my life, inspiring guidance and constant motivation helped me to achieve
goals in research. I am grateful to his attitude for giving me liberty in the work I
have undertaken and enjoyed. Without his persuasion and interest, it would not have
been possible for me to gain confidence that I have today. I salute and respect his
supporting attitude that has always led me to think and work independently. I am
equally grateful to Dr. Milind S. Patole for his guidance and help in my research
work.
I wish to express my respect and gratitude to our collaborator Dr. Mourya,
Director, MCC-NIV, Pune for providing Anopheles stephensi midgut tissues. I
would like to thank Dr. Rajendra Joshi, Director, C-DAC and Santosh Atanur
their help in bioinformatics analysis and hosting the EST database at C-DAC.
It is impossible to carry out research work without the help of my colleagues. I
thank Deepak Patil for his constant help and encouragement during this research.
Without his help completion of this work was almost impossible. Many thanks to
Girish, Sandeep, Rakesh, Vineet, Pankaj Ghate, Jay Patankar and Abhishek
Shrivastava for their help in DNA sequencing. I extend my sincere thanks to Sarang Satoor for his help in DNA sequencing. I thank Rahul Salunkhe and Shrikant Pawar for their help in writing and drafting this thesis.

I sincerely appreciate my trainees Mano Mathew and Neha Gupta for doing a part of bioinformatics analysis. I thank Dimple Davray for her help and support in divergence time estimation.

I would like to thank Dr. Mahesh Dharne, Dr. K. Dayananda, Dr. Aijaz Wani and Dr. Sachin Surve for their help and guidance during my research in NCCS. I appreciate the support and friendly atmosphere provided by them.

It is my immense pleasure to express thanks to special friends, Shrikant, Deepak and Rahul and many others for putting enormous efforts to help me see this day in my research career. I also thank to all other research scholars and non-teaching staff of NCCS. My lab mates at NCCS, Dr. Antony, Mr. Avinash, Mr. Amit, Mr Snehit, Dr Himanshu, Dr. Arvind, Dr. Pankaj, Dr. Mahesh, Mr. Prashant and Mr. Shakti also reserve a same sense of gratitude for constant help and support.

Finally, I would like to sincerely thank people who helped me either directly or indirectly in this thesis. Scientific research is a group activity. It is not possible without the help and suggestions of people.

I would like to thank all MCC staff and my colleagues for their support in completing my thesis work.

No words could express gratefulness to my parents, wife, daughter and my family members. Without their love, patience, sacrifice, support and faith in this long journey, this work would not have been possible for me!

Dhiraj Prakash Dhotre
