ACKNOWLEDGEMENT

First of all I pay all my homage and designate my emotions to the lord almighty whose blessings promote me to accomplish this interesting task. This task required effort from many people without them it would not have been completed. It is with great pleasure and with deep sense of gratitude, to my esteemed mentor and guide Dr. Ashok Narayan Patil, who has inspired me with keen interest and ever vigilant guidance without which this task could not have been achieved. He has not only guided me but also acted as a co-traveler throughout my research work. It is the result of his unfailing efforts and meticulous training that today I have reached my destination.

I am also thankful to our PhD Coordinator of JJT-Univ.-Rajasthan, who provided me all kind of moral support that I needed to carry out my research work.

I am very much grateful to my beloved parents Mr. Babulal D. Mahajan and Mrs. Devka B.Mahajan for their kind and affectionate cooperation during the entire research work and in beautifying the presentation of work in the form of thesis.

Kishor Babulal Mahajan
