Acknowledgements

I would like to express my sincere and heartfelt thanks to my guide Dr. Luke Elizabeth Hanna for her guidance and immense trust in me throughout my Ph.D programme. The encouragement and support she has provided me over the past years have been and will continue to be indispensable for my professional development.

Foremost, I owe my deep sense of gratitude to Dr. Subash Babu, Scientific Director, NIH-ICER for his continued guidance throughout this study. I thank him for providing me with all the essential needs for research at the NIH-ICER facility. I have always admired him for his wide knowledge in both scientific and nonscientific aspects. I am thankful to him for the opportunities he had provided me to learn and inculcate the research skills in me. The independence and freedom he gave in his lab and the work shaped me as a better researcher.

I would like to express my special gratitude and thanks to Dr. Soumya Swaminathan, Director, NIRT for providing the essential support I needed to complete my work. Her enthusiasm in research has motivated all research students, including me.

I am most grateful to Dr. V. Kumaraswami, former Director-in-charge/HOD Department of Immunology, for granting permission to carry out my Ph.D in our research institute.

I am thankful to Dr. Alamelu Raja, HOD, Department of Immunology for permitting me to use the department facilities and also for being one of my doctoral committee member as well as providing me with encouragement and valuable suggestions.
I express my sincere gratitude to Dr. Thomas B Nutman, Chief, Helmith Immunology, Laboratory of Parasitic Diseases, National Institutes of Health, USA for his timely help and critical comments for the progression of my research. I am privileged to have his constant support, encouragement, affection and guidance.

My sincere thanks extend to Dr. P.Selvaraj, Dr. Sulochana Das and Dr. Sujatha Narayanan from the Department of Immunology, NIRT for their kind words and encouragement.

I render my sincere thanks to Dr. M.S Jawahar and Dr. Banu Rekha NIRT for providing blood samples and valuable suggestions thorough the course of the study.

My deepest and sincere thanks to Dr. Sridhar and Dr. Geetha from Stanley Medical College and Hospital for extending a helping hand in sample collection and also for their valuable suggestions and caring attitude during the course of the study.

I express my sincere thanks to Dr. Neeranjali Devaraj, HOD, Dept of Biochemistry, University of Madras for her guidance and support as a doctoral committee member.

My hearty thanks to Dr. Bruno Andrade, LPD, National Institutes of Health, USA for his immense support and for enlightening me on the various aspect of immunology.

I am thankful to Mr. Ramanujam Senior Technical Officer (Rtd) and Mr. Sankaran Senior Technical Officer, Dept. of Immunology for their kind help by making available key reagents and plastic wares during my study.

I extend my unconditional thanks to the HODs of the all the departments in the NIRT for their care and support during my study.
I have been blessed with friendly and cheerful friends in my lab. I thank **Ms. R. Anuradha and Mr. Jovvian George** for providing an amicable environment in the lab. I acknowledge the personal care and love extended to me during my stay in the lab. They have made the atmosphere around me more lively and energetic.

I am greatly thankful to **Ms. V. Shanthi** for her constant and sincere help with the official work and for the personal care and concern. I thank **Mr. Anbalagan, Dr. Anbarasu, Ms. Suganthi, Mr. Srinivasaraju, Mr. Harishankar, Ms. Chitra, Dr. Kannan, Mr. Shivakumar, Mr. Kabirdoss and Mr. Adhikesavan** for their timely help and amicability.

I wish to express my cordial gratitude to all the staff at ICER facility for creating a friendly working atmosphere. My special thanks to **Dr. Satishwaran, Mr. Sajid, Mr. Gopinath, Mr. Kadhar, Ms. Craena, Dr. Saravanan, Mr. Prabhu, Mr. Jai Ganesh, Ms. Sathayavani, Mr. Gopi, Mr. Chandrasekar, Mr. Sadhasivam, Mr. Tamilvandan, Mr. Sayeed and Mr. Ezhumalai**.

My sincere and heartfelt thanks all my student friends of NIRT, whose care, affection, sharing of knowledge we had, I fondly remember. My special thanks to **Mr. Brijendra Singh, Mr. Afsal, Mr. Arun, Ms. Malani, Mr. Srinivasan, Ms. Subha, Ms. Rafia, Ms. Santhi, Ms. Prabhavathi, Mr. Balaji, Mr. Pukazhvendhan, Ms. Akilandeeswari, Ms. Nancy, Dr. Sameer Hassan, Mr. Jagadish and Mr. Narayaniah**.

I greatly acknowledge the Librarian **Mr. R. Rathinasabapathi, and EDP staff members**, for providing us with the world class digital library facility. I thank **Mr. Arul and Mr. Vijayan** for providing us with latest softwares and technical support during the course of my Ph.D.

I thank the International Center for Excellence in Research (ICER) for financially supporting me during these years.
I specially thank Dr. Varadharajulu, Pathologist for his valuable suggestions, immense support, encouragement and affection shown upon me throughout my research carrier.

I sincerely acknowledge all the volunteers and patients who form the backbone of this study and without whom my research would have not been accomplished.

From the bottom of my heart I thank my family: my mom, beloved wife and affectionate brother who provided a loving environment and emotional support throughout the growth of my research carrier. My family members deserve something more than an acknowledgement for all their kindness and trust in me, and I dedicate my work to them.

Last but not least I thank The Almighty for the blessings showered upon me and given me strength, confidence and courage throughout.

N. Pavan Kumar

Chapter 2: Immune Responses to Tuberculosis with coincident Type 2 Diabetes Mellitus

| I. Type 2 diabetes mellitus coincident with pulmonary tuberculosis is associated with heightened systemic Type 1, Type 17 and other pro – inflammatory cytokines | 78       |
| II. Expansion of Pathogen-Specific T-Helper 1 and T-Helper 17 Cells in Pulmonary Tuberculosis With Coincident Type 2 Diabetes Mellitus | 89       |
III. Type 2 diabetes mellitus is associated with elevated frequencies of Type1 / Type 17 cytokine secreting CD8$^+$ T and NK cells in pulmonary tuberculosis

IV. Heightened Plasma Levels of Heme Oxygenase-1 and Tissue Inhibitor of Metalloproteinase-4 and Elevated Neutrophil Counts are Associated with Increased Risk of Tuberculosis-Diabetes Co-morbidity

V. Type 2 diabetes mellitus coincident with pulmonary tuberculosis results in diminished adipocytokines and enhanced pancreatic and gut hormones
