STUDIES ON THE ROOT- INFECTING FUNGI WITH
SPECIAL REFERENCE TO MICROBIAL ANTAGONISMS

By
VITTLAL RAO, MANNE

A thesis submitted to
Sri Venkateswara University for the degree of
Doctor of Philosophy.

JULY, 1964.
CONTENTS

Acknowledgments

I. INTRODUCTION

II. MATERIALS AND METHODS

A. Materials

1. Fungi selected for study

2. Soil used

3. Plant materials used

B. Methods

1. Isolation of *Fusarium oxysporum* f. *vasinfectum* from local soil.

2. Maintenance of test fungi

3. Preparation of oatmeal-sand

   inoculum of *Fusarium oxysporum* f. *vasinfectum*

4. Screening soil for antagonists

5. Test for degree of antagonism

   on agar plates

6. Production of antibiotic principles

   in liquid culture and in soil

7. Pathogenicity tests with *Fusarium oxysporum* f. *vasinfectum*

8. Estimation of *Fusarium oxysporum* f. *vasinfectum* in soil
9. Determination of competitive saprophytic ability by the "Agar plate method".

10. Estimation of *Fusarium oxysporum* f. *vasinfectum* inside the host.

III. EXPERIMENTAL RESULTS

1. Isolation of antagonists from soil.

2. Production of antibiotic principles.

   The Effect of fresh nutrient amendments on wilt development.

   Effect of insubation of the inoculum-soil mixture on disease development.

   The effect of age of inoculum on the development of wilt.

5. Development of wilt in resistant cotton variety M.C.J. 1.

7. Changes in competitive saprophytic ability of the cotton wilt fungus in soil.
