Pursuing a Ph.D. is like a difficult journey just like climbing a high peak, step by step, accompanied with happiness, excitement, fun, hardship, frustration, encouragement and belief. Which becomes easy when you travel together, where interdependence is certainly more valuable than independence. Now, as I stand at the threshold of completing my doctoral work, I take this special moment to express my sincere appreciation and praise for those who accompanied and supported me throughout these years.

What could be better way than this to acknowledge your teacher, but for whom I am writing these words deserves much more than this. A teacher, beyond the definition of a Ph.D supervisor Prof. R.N.K, Bamezai with whom I meant hard work and persistent determination in real sense. His wide knowledge and his logical way of thinking have been of great help for me. He showed me different ways to approach a research problem. I am thankful to him for his constant guidance and having faith in my abilities. His inspiring and encouraging way to guide me to a deeper understanding of knowledge work and his invaluable comments during the whole work with this project is highly appreciated. I really feel blessed to get this opportunity to work with such a good teacher. I sincerely wish to imbibe his poise, uncompromising, humble and affable nature.

I also thank the present Director, Prof. V. Verma, Dean Dr. V.K, Bhat and all the previous directors and deans for providing excellent facilities in the School. I also appreciate the help and support provided by the faculty members of the School of Biotechnology.

I would like to acknowledge centralized MassARRAY set up at SMVDU and School of Biotechnology office staff for their assistance. Special thanks to Vinod Sir and Tripti mam for their help and support.

I also value the support of NCAHG, SLS, JNU for their time to time help in experiments by means of their facilities.

I greatly acknowledge Department of Science and technology - J&K and National Center of Applied Human Genetics (NCAHG) for the financial assistance.

I express my sincere thanks to Dr. Vijay Kumar Garg, Head of Department of Dermatology and Sexually Transmitted Diseases, LNJP hospital, and his team for their invaluable help in providing me with patient samples and their clinical details. I do not want to lose the opportunity to thank Dr. S.N. Bhattacharya, Head of Department of Dermatology, GTB hospital and his team for their assistance in sample collection. I am also thankful to Dr. R.P. Gupta, dermatologist for his help in sample collection. I shall always remain indebted to all the leprosy patients and normal volunteers for donating their blood without which present study would have been simply impossible.

I would like to convey my heartfelt thanks to Shri Mata Vaishno Devi University, for providing me the ideal environment to grow as a person. I want to express my deep thanks to my bachmates Kalai, Siddharth and Archana for their help and support.
Thanks to all my lab members of NCAHG for providing a healthy and scientific working atmosphere. I express my heartfelt thanks to the seniors Dr. Dheeraj Malhotra, Dr. Sawerkar Sharma, Dr. Niloo Shrivastava, Dr. Ekta Rai Sharma, Dr. Prithvi, Anil sir, Dr. Meenu, Shweta mam, Dr. Ranjana Pal and Dr. Anita Kaul all of whom have been extremely helpful whenever I approached them, Dr. Sailesh Gochhait deserve a special mention for their scientific assistance in considerable portion of my work.

I am extremely fortunate to have worked with a wonderful team at NCAHG. I express my gratitude to Shafat and Shweta for their support and invaluable help. I am grateful to Rajnish, Bhupinder and Amit to provide any sort of help I needed. I heartily thank Surbhi, Vibhor, Mamta, Shilpi, Nabodita, Yoginder, Askander, Anita B, Archita, Noor, Shazia, Farid, Gopi, Kailash and Sunil who made the lab life enjoyable. Shruti, Faheem, Kashif, Kamal, Naresh, Anupama, Shweta N, Piyush, Dilip, Monika, Samra, Srishti, Vatsala and a number of dissertation students who made their contributions were just perfect to create a positive lab environment. I am also thankful to Subhendu for providing me with healthy control samples.

I would like to acknowledge Rita mam, Somu ji and Sonu for their helpful nature and administrative assistance. Kamta ji and Ghanshayam ji require special mention for their help in smoothening of my research work.

Words fail to express my gratitude for my dearest friends Garima, Rakesh and Sumesh for their love, affection and moral support which made my every moment cherishable and memorable. I would like to thank my friends: Shivani, Prashant, Pragya, Jinny, Farhan, Abha and Pooja. I am indebted to my teachers, especially Prof. Mitali Mukerji, Dr. S. Laxmidevi, Dr. Rekha Mehrotra, Dr. Sadhna Jain, Dr. Jasjeet Kaur, Dr. Puneeta Saxena, Ms. Daya Bhardwaj, Ms. Preeti Singhal, Ms. Venika Gupta for making me enthusiastic about the subject.

I am indebted to my Dr. chacha ji and Dr. chachi ji for the love and care they gave me. Words are not enough to thank my brothers Kunal and Dhruv who always supported me.

Anything I say about my parents would be an under representation of the help, love, affection and encouragement that he bestowed upon me. They always shared my emotional out bursts at failures and motivated me to fight hard to achieve my goals. Their firm and kind hearted personality has affected me to be steadfast and never bend to any difficulty. They always respected my decision and applauded smallest of my achievements. They provided me invaluable help in collection of patients and control samples. I am indebted to my grandparents as their blessings are foremost important.

I would like to thank every person who helped me directly or in directly and whose name couldn’t find a mention here, I will always remain grateful of them. Above all, thanks to Almighty God for giving me strength and courage all these years and taking care of all my needs.
