ACKNOWLEDGMENTS

It is with eternal gratitude, most humbly & respectfully and in all submissiveness, I offer my silent and sincere obeisance in the Lotus Feet of the Gracious Huzur Radhasoami Dayal for His unbounded Grace and blessing during the entire course of this work. I also pray for His Grace forever.

A journey is easier when you travel together. This thesis is the result of four years of work whereby I have been accompanied and supported by many people. It is a pleasant aspect that I have now the opportunity to express my gratitude to all of them.

I am in dearness of words in expressing my deep sense of gratitude towards my supervisor Dr. (Mrs.) Vibha R. Satsangi, Reader, Department of Physics & Computer Science, D.E.I., for her precious and benevolent guidance. Her continued interest, supporting and inspiring attitude enabled me to overcome all the practical problems at crucial junctures. She not only offered professional assistance but also countless personal help to me for which I would be ever indebted to her. Her overly enthusiasm and integral view on research and her mission for providing 'only high-quality work and not less', has made a deep impression on me.

I submit my deep sense of gratitude to Dr. Sahab Dass and Dr. Rohit Shrivastav, Reader, Dept. of Chemistry, D.E.I., for their valuable suggestions, stimulating discussions and continuous support. They also took effort in providing me valuable comments in the earlier versions of this thesis, without which this thesis could not have taken the shape.

Prof. V. G. Das, Director, D.E.I., Agra has always been a source of inspiration for me. I express my deep sense of gratitude for him.

I humbly thank Prof. K. K. Dua, Dean, Faculty of Science and Prof. R. M. Agrawal, Head, Department of Physics & Computer Science, D.E.I. for providing necessary facilities and help. My sincere thank to my
teachers Prof. M. L. Srivastava, Prof. Satish Kumar, Dr. G. S. Tyagi, Dr. C. M. Markan and Dr. Sukhdev Roy for their encouragements and supports.

I have no words to express my thanks to Prof. K. Sreenivas and Dr. Vinay Gupta, Department of Physics & Astrophysics, University of Delhi, Delhi, for permitting me to avail facilities of their Department in the deposition of metal dots. I am also grateful to them for various valuable and encouraging discussions, I had with them during my stay there.

My sincere thanks to Dr. M. Shyamprasad, National Institute of Oceanography (NIO), Goa, for carrying out scanning electron microscopy and to Prof. R. K. Sharma, Solid State Physics Laboratory, New Delhi for XRD measurements of my samples.

I have no words to acknowledge the support, help and above all companionship I received from my co-worker Mr. Aadesh P. Singh.

I gratefully acknowledge the active co-operation and invaluable support offered by my friends and coworkers, particularly: Dr. Y. S. Chaudhary, Mr. Chanakya Tripathi, Dr. Diwakar Chauhan, Dr. (Mrs.) Shobhita Tonk, Mrs. Jagpreet Kaur, Ms Lotika, Ms. Pooja Johri, Ms. Monika, Ms. Jaya, Dr. Parag, Mr. Kapil Kulshreshtha, Mr Pourush, Mr Ashok.

I gratefully acknowledge Department of Science and Technology (DST), New Delhi for providing the partial financial assistance for this work.

I wish to thank my friend Mrs. S. P. Satsangi (Dolly) and her family, who have always been the source of inspiration and energy in my life. They also formed part of my vision and taught me the good things that really matter in life.

My loving gratefulness wells up in my heart for my parents, my loving sister for their relentless physical & moral support and encouragement. They are all perennial fountains of inspiration in all my endeavors.

June, 2007
