

LIST OF FIGURES

Figure No.	Title	Between Page No.
Fig. 1	Mean Fortnightly temperature and rainfall data during crop growth period in 1995-96 and 1996-97	35-36
Fig. 2	Layout plan of the experiment	36-37
Fig. 3	Height of plant at harvest as influenced by Varieties, Nitrogen and Sulphur.	47-48
Fig. 4.1	Number of siliquae per plant as influenced by varieties, N and S levels during 1995-96 and 1996-97.	56-57
Fig. 4.2	Weight of grains per plant as influenced by varieties, N and S levels during 1995-96 and 1996-97.	62-63
Fig. 4.3	1000-grain weight (g) as influenced by varieties, N and S levels during 1995-96 and 1996-97.	64-65
Fig. 5	Grain and strover yield (kg/ha) as affected by Varities, Nitrogen and Sulphur during 1995-96 and 1996-97.	65-66
Fig. 6	Total Dry Matter Production (kg/ha).	72-73
