LIST OF TABLES

Table 1 : Effect of irrigation and mulching on fruit cracking in lemon.

Table 2 : Effect of irrigation and mulching on periodical incidence of fruit cracking in lemon.

Table 3 : Effect of irrigation and mulching on fruit size of lemon.

Table 4 : Effect of irrigation and mulching on fruit weight, fruit volume and specific gravity of lemon.

Table 5 : Effect of irrigation and mulching on peel thickness of lemon fruit.

Table 6 : Effect of irrigation and mulching on moisture content in peel and pulp of lemon fruit.

Table 7 : Effect of irrigation and mulching on juice content and ascorbic acid content of lemon fruit.

Table 8 : Effect of irrigation and mulching on total soluble solids and acidity of lemon fruit.

Table 9 : Effect of irrigation and mulching on chlorophyll content in peel of lemon fruit.

Table 10 : Effect of irrigation and mulching on calcium and potassium content of peel of lemon fruit.
Table 11a : Effect of irrigation and mulching on tree height of lemon.

Table 11b : Effect of irrigation and mulching on trunk girth of lemon.

Table 12a : Effect of irrigation and mulching on tree spread (E-W) of lemon.

Table 12b : Effect of irrigation and mulching on tree spread (N-S) of lemon.

Table 13a : Correlation of fruit cracking with various physical and chemical characters of lemon fruit.

Table 13b : Correlation of fruit cracking with various meteorological factors during morning and afternoon.

Table 14 : Effect of organic and inorganic nutrient sources on fruit cracking in lemon.

Table 15 : Effect of organic and inorganic nutrient sources on periodical incidence of fruit cracking in lemon.

Table 16 : Effect of organic and inorganic nutrient sources on fruit size of lemon.

Table 17 : Effect of organic and inorganic nutrient sources on fruit weight, fruit volume and specific gravity of lemon.

Table 18 : Effect of organic and inorganic nutrient sources on peel thickness of lemon fruit.

Table 19 : Effect of organic and inorganic nutrient sources on moisture content in peel and pulp of lemon fruit.
Table 20 : Effect of organic and inorganic nutrient sources on juice and ascorbic acid content of lemon fruit.

Table 21 : Effect of organic and inorganic nutrient sources on total soluble solids and acidity of lemon fruit.

Table 22 : Effect of organic and inorganic nutrient sources on chlorophyll content in peel of lemon fruit.

Table 23 : Effect of organic and inorganic nutrient sources on calcium and potassium content of peel of lemon fruits.

Table 24a : Effect of organic and inorganic nutrient sources on tree height of lemon.

Table 24b : Effect of organic and inorganic nutrient sources on trunk girth of lemon.

Table 25a : Effect of organic and inorganic nutrient sources on tree spread (E-W) of lemon.

Table 25b : Effect of organic and inorganic nutrient sources on tree spread (N-S) of lemon.

Table 26 : Effect of foliar spray of growth regulator (NAA) and nutrients on fruit cracking in lemon.

Table 27 : Effect of foliar spray of growth regulator (NAA) and nutrients on periodical incidence of fruit cracking in lemon.

Table 28 : Effect of foliar spray of growth regulator (NAA) and nutrients on fruit size of lemon.
Table 29 : Effect of foliar spray of growth regulator (NAA) and nutrients on fruit weight, fruit volume and specific gravity of lemon.

Table 30 : Effect of foliar spray of growth regulator (NAA) and nutrients on peel thickness of lemon fruit.

Table 31 : Effect of foliar spray of growth regulator (NAA) and nutrients on the moisture content in peel and pulp of lemon fruit.

Table 32 : Effect of foliar spray of growth regulator (NAA) and nutrients on juice and ascorbic acid content of lemon fruit.

Table 33 : Effect of foliar spray of growth regulator (NAA) and nutrients on total soluble solids and acidity of lemon fruit.

Table 34 : Effect of foliar spray of growth regulator (NAA) and nutrients on chlorophyll content in peel of lemon fruit.

Table 35 : Effect of foliar spray of growth regulator (NAA) and nutrients on calcium and the potassium content of peel of lemon fruit.

Table 36a : Effect of foliar spray of growth regulator (NAA) and nutrients on tree height of lemon.

Table 36b : Effect of foliar spray of growth regulator (NAA) and nutrients on trunk girth of lemon.

Table 37a : Effect of foliar spray of growth regulator (NAA) and nutrients on tree spread (E-W) of lemon.
Table 37b : Effect of foliar spray of growth regulator (NAA) and nutrients on tree spread (N-S) of lemon.

Table 38 : Effect of treatment combinations on fruit cracking in lemon.

Table 39 : Effect of treatment combinations on periodical incidence of fruit cracking in lemon.

Table 40 : Effect of treatment combinations on fruit size in lemon during 2007.

Table 41 : Effect of treatment combinations on fruit weight, fruit volume and specific gravity of lemon.

Table 42 : Effect of treatment combinations on peel thickness of lemon fruit.

Table 43 : Effect of treatment combinations on moisture content of peel and pulp of lemon fruit.

Table 44 : Effect of treatment combinations on juice and ascorbic acid content of lemon.

Table 45 : Effect of treatment combinations on the total soluble solids and acidity of lemon fruit.

Table 46 : Effect of treatment combinations on chlorophyll content in peel of lemon fruit.

Table 47 : Effect of treatment combinations on calcium and potassium content of the peel of lemon fruit.

Table 48a : Effect of treatment combinations on tree height of lemon.
Table 48b : Effect of treatment combinations on trunk girth of lemon.

Table 49a : Effect of treatment combinations on tree spread of lemon (E-W).

Table 49b : Effect of treatment combinations on tree spread of lemon (N-S).
