List of Figures

Figure 1.3.1.1: Bloch sphere ................................................................. 1-8
Figure 1.3.3.1: Symbol for Toffoli Gate .................................................. 1-14
Figure 1.3.3.2: Symbol for Fredkin Gate .................................................. 1-14
Figure 1.3.4.1: Example of Quantum Circuit ............................................. 1-18
Figure 1.3.5.1: Reversible implementation of Classical Oracle ....................... 1-19
Figure 1.3.5.2: Quantum Oracle ............................................................... 1-20
Figure 1.3.5.3: Controlled Phase Quantum Oracle ........................................ 1-20
Figure 1.3.7.1.1: Quantum Circuit for Deutsch-Jozsa’s Algorithm .................... 1-23
Figure 1.3.7.2.1: Quantum Circuit for Simon’s Algorithm ................................ 1-25
Figure 1.3.7.3.1: Quantum Circuit for period finding in Shor’s Algorithm .............. 1-27
Figure 1.3.7.4.1: Circuit for Quantum Search Algorithm .................................. 1-28
Figure 1.5.1.1: Pseudo Code for Canonical Evolutionary Algorithm ................... 1-37
Figure 1.5.4.1: Observation of Qubit String ............................................... 1-42
Figure 1.7.3.1: Typical Pareto optimal front for an MOP with two objectives .......... 1-52
Figure 2.1.1: Grover’ Quantum Search described as rotation of state vector in 2 dimensional subspace ......................................................... 2-4
Figure 2.1.2: Variation in Success Probability with Rotation Count and P ............... 2-5
Figure 2.2.1.1: Quantum Circuit for Amplitude Estimation ............................. 2-6
Figure 2.2.3.1 Quantum Circuit for the Measurement based fixed point Algorithm ... 2-12
Figure 6.3.6 Welded Beam ................................................................. 6-16
Figure 6.3.7 Convergence Graph for the Problem P-5 on Median run ..... 6-17
Figure 6.3.8 Pressure Vessel ............................................................. 6-18
Figure 6.3.9: Convergence Graph for the Problem P-6 ......................... 6-19
Figure 7.1.3.1: Convergence graph for case – 1, 4, and 7 ....................... 7-10
Figure 7.1.3.2: Convergence graph for case – 5, 8 ............................... 7-10
Figure 7.1.3.3: Convergence graph for case – 9 .................................. 7-11

Figure 1: Photoluminescence measurement data set for 10nm single quantum well samples of In_{0.2}Ga_{0.8}As/GaAs annealed at 1173K, 1223K, 1273K and 1323K as diffusion length squared as a function of the annealing time

Figure 7.3.3.1: Convergence graph of median run for dataset with 1173K annealing temperature
Figure 7.3.3.2: Convergence graph of median run for dataset with 1223K annealing temperature
Figure 7.3.3.3: Convergence graph of median run for dataset with 1273K annealing temperature
Figure 7.3.3.4: Convergence graph of median run for dataset with 1323K annealing temperature
Figure 7.3.3.5: Convergence graph of median run for Collective Run ........ 7-30
Figure 7.4.4.1: Location Estimation for Case-I ..................................... 7-40
Figure 7.4.4.2: Location Estimation for Case-II ..................................... 7-40
Figure 7.5.4.1: Plots of optimal Pareto Front and Efficient Front obtained by MOO-ARQEA 7-45
