List of Figures

Chapter 3

Fig 3.5.1 Setup for Load Pull Analysis ......................................................... 26
Fig 3.5.2 Flow Chart of Harmonic Balance Simulation ......................... 27
Fig 3.5.3 Resulting PAE and delivered power contours drawn in Smith Chart .......... 27
Fig 3.5.4 Gain & Output Power for power matched amplifier ............. 28
Fig 3.6.1 Plot of Output Power ................................................................. 28
Fig 3.6.2 Gain & Compression ................................................................. 28
Fig 3.6.3 PAE, AM-PM Conversion and IMD at 1dB and 2 dB Compression point .... 29
Fig. 3.8 Layout of the Power Amplifier ..................................................... 30
Fig. 3.10 Block diagram of SSPA with dynamic bias approach .............. 31

Chapter 4

Fig 4.3 High Frequency Model of RF MOSFET ............................................ 40
Fig 4.5.1 Gain response at two different frequencies .......................... 44
Fig 4.5.2 Stubs for two different frequencies ............................................ 44
Fig 4.5.3 Schematic of Flexible Frequency Amplifier with Lumped Matching Network 45
Fig 4.5.4 Schematic Diagram of Flexible Frequency Amplifier with Varactor diode Network ................................................................. 45
Fig 4.5.5 Output Power and Efficiency response at different frequency .... 47
Fig 4.5.6 Load pull counters for GaN HEMT power device .................. 49
Fig 4.6.1 Simulated results for Gain versus different bandwidth .......... 51
Fig 4.6.2 Output Power and efficiency response at frequency 243 MHz ..... 51
Fig 4.7.1 Tele-commendable Attenuator circuit to change the voltage to PIN or Varactor Diode ................................................................. 52

Chapter 5

Fig 5.7.1 Single Stage Amplifier of High Power SSPA at UHF band ........ 62
Fig 5.7.2 Balanced Configuration using two devices in parallel .............. 62
Fig 5.7.3 Thermal Counters of the case temperature for single stage and Balanced Configuration ................................................................. 64
