ACKNOWLEDGEMENT

I would like to express my heartfelt gratitude to my research guide, Dr Amitava Mukherjee, Senior Professor and Deputy Director, CNBT, for his valuable advice constant guidance, encouragement, constructive discussions and timely suggestions during my doctoral research endeavor for the past five years. His observations and comments made me establish overall research direction and helped me to progress with an in-depth investigation. During the most difficult times when writing this thesis and research papers, he gave me the moral support and the freedom when I needed. He helped me publish my research in reputed journals with good number of publication during my Ph.D. course. Without him as a very honorable research guide, I could not have made it here.

I am grateful to the Chancellor of VIT University, Dr G.Viswanathan, the Vice Presidents, and the Vice Chancellor for providing financial support and excellent infrastructural facilities for me to carry out research.

I am indebted to Dr N. Chandrasekaran, Senior Professor and Director, CNBT, for his constant encouragement and support in carrying out research works. Providing good laboratory support and equipment for my research. I would like to thank my research adviser Dr R. Nagarajan, Professor, Dean [I & AR], Chemical Engineering, IITM for his commands and suggestion on my doctoral research

I am very much grateful to my doctoral committee members, Dr G K. Suraish Kumar, Professor, Dept. of Biotechnology, IIT Madras, and Dr Ashok M. Raichur, Professor, Dept. of Materials Engineering, IISc. Bangalore, for their perceptive comments and constructive criticisms at different stages of my work.

Most enduringly, I would like to convey my heartfelt love and gratitude to my parents Mr Manivannan, Mrs Usha who sacrificed a lot for my happiness and brought me up to this esteemed stage.

I am indebted to all my seniors for their continuous support and encouragement. Mainly, I would like to acknowledge Dr Sunandan Pakrash and Dr Swayamprava Dalai, who helped me to learn the very basics of my research.
I would thank Dr Shiny PJ, Dr Justin Samuel, Dr Madona, Dr Rajeshwari for the many valuable suggestions, constant support, and guidance. I would like to thank my batch mates Dr Ida Evangeline Paul, Dr Ankita Mathur, Iswarya V, for their support suggestions and timely help in many ways.

Special thanks to my friends and colleagues Swathy, Sofia, Karthika, Vijaykumar, Prabaker Mishra, Nandha Kumar, Johnson, Saravanan, Sruthi, Vidhya, and Ravi Kumar KVG for their help and support.

I am thankful to my friends Madhav MR and Sajith Kumar for their timely support and care.

I am thankful to the instrumentation facility at SAIF-IITM for various analyses done for this thesis. Particularly, thanks to Mr. Chiranjivi, SAIF-IITM for helping me in ICP-OES analysis. I am thankful to Miss Rita, CMC Wellcome group for helping me in TEM microscopy. I extend my thanks to each and every single friends of mine who have helped me directly or indirectly to pursue my research.

This acknowledgement will not be complete without mentioning my very close friend Mr. Einstein Mariya David for his timely encouragement and motivation in tough periods of my life.

I am greatly thankful to the LORD ALMIGHTY JESUS CHRIST for blessing me and leading me to the head of success in my research work.

Place: Vellore                                Bhuvaneshwari M
