ACKNOWLEDGEMENTS

At the outset I owe my thanks to Periyar University, Salem for having blessed me with a golden opportunity to carry out my research in the Department of Physics, Periyar University, Salem. This research was done under the able guidance and stewardship of Dr. G. VELRAJ, Assistant professor, Department of Physics, Periyar University, Salem. He has been guiding me at every step and his encouragement, motivation and scholarship put me on the path of academic achievement. I wish to thank him par excellence for his continuous guidance towards the success of my research work.

I also thank Dr. V. Krishnakumar, Professor and Head, Department of Physics, Periyar University, Salem for his enormous generosity. His ideas and influence created lots of hope in my thesis. He has instilled integrity and his wisdom, encouragement and confidence in me were always a source of inspiration.

In the Department of Physics, I have benefited considerably from the academic contributions of the faculty and I am proud to be associated with them. As well, I am delighted to thank Dr. P. Kumaradhas, Dr. P. M. Anbarasan, Dr. L. Kavitha, and Dr. E. K. Grija, Department of Physics, Periyar University, Salem. I am enchanted to thank the non-teaching staffs of Department of Physics, Periyar University, Salem.
I am grateful to the Respectable Professor Dr. M. G. Mohamed Kamil, Retd. Vice Principal and HOD, Department of Physics, New College Chennai. For encouraging and allowing me to perform a part of my research works in his Department laboratory. He inspired and motivated my self-confidence and honed my talent with his acumen. I take this opportunity to thank my warm, supportive and enthusing teaching and non – teaching staff of the Department of Physics, The New College, for their unfailing assist and support throughout my scientific enquiry.

I am grateful to Dr. P. E. Akilandeswari, Assistant professor, Department of Physics, J.B.S.C College, Chennai, for the timely help rendered by her in many doubtful situations in the research work.

I am grateful to the suppliers of the chemicals. I am indebted to The Director, Orchid chemicals, Chennai, for giving permission to record UV and FTIR spectra in there laboratory. I also thank Dr. R. Murugan, Scientist, for helping me to get permission and to record the spectra from the orchid chemicals. I am thankful to Mr. Y. Vincent; Staff-in-charge of the Instrumentation Lab, St. Joseph College, Tirichy, for assisting me in recording of (FT-IR) spectra in his well-equipped laboratory.

I am pleased to thank DST and CCSTDS for having provided me international travel fellowship to participate and present my paper in the international conference at Kuala lumbur, Malaysia.
My heart goes out to my colleagues, co-research scholars and friends who stood by me like a solid rock. These wonderful friends who selflessly offered logistical support in many instances. Thank you buddies.

Above all, I am grateful to my family for their infinite love, steadfast support and patience. This thesis could not have been completed without their involvement and I am forever indebted to them.

I thank one and all who have contributed their mite in enabling me to come out in my research project with flying colours.

C. Roumana
