INTRODUCTION AND LITERATURE REVIEW

Background of the Study 1
Concept and Definitions of Well-being 1
Hedonic Well-being 2
Eudaimonic Well-being 3
Hedonic Versus Eudaimonic Well-being 3
Subjective Well-being 3
Adaptation Level Theory 4
Set-Point Theory 5
Theory of SWB Homeostasis 5
PERMA Model 5
Measures of Subjective Well-being 6
Life Satisfaction 6
Approaches to Life Satisfaction 7
Top Down Approach 7
Bottom up Approach 7
Life satisfaction and Demographic Variables 9
Depressive Symptoms 9
Depressive Symptoms and Demographic Variables 10
Depression in Kashmir 11
Life Satisfaction and Depressive Symptoms: Two poles of Subjective Well-being 11
Stress 12
Approaches to Stress 13
Forms of Stress 14
Physiological consequences of Stress 15
General Adaptation Syndrome 16
Psychological Consequences of Stress 17
Sources of Stress (Stressors) 17
Stressful Life Events 18
Stress in Kashmir 18
Stress and Well-being 19
Stress and Life Satisfaction 19
Stress and Depressive Symptoms 20
Social Support 21
Received v/s Perceived Social Support 22
Social Support and Stress 23
Stress Buffering Model 23
Direct Impact Model 23
Social Support and Life Satisfaction 24
Social Support and Depressive Symptoms 25
Psychological Capital (PsyCap) 26
Resilience 28
Subjective Well-being and Resilience 30
Hope 31
Subjective Well-being and Hope 33
Self-efficacy 34
Subjective well-being and Self-efficacy 36
Subjective Well-being and Psychological Capital 37
Rationale 39
Objectives 40
Hypothesis 41
Conceptual Framework Regarding the Relationship among Variables 42

**METHOD**

Variables 43
Design 43
Participants 43
Inclusion Criteria 45
Exclusion Criteria 45
Tools

Life Events Questionnaire  45
Pilot Study for adapting Life Events Questionnaire  46
Brief Psychological Capital Questionnaire (developed by the investigator)  47
Resilience Scale  47
Adult Hope Scale  48
General Self-Efficacy Scale (GSES)  48
Pilot study for developing Brief Psychological Capital Scale and determining its psychometric properties.  49
Multidimensional Scale of Perceived Social Support  52
Satisfaction with Life Scale  52
Centre for Epidemiological Studies Short Depression Scale (CES-D 10)  53
Translation of scales in Urdu and Kashmiri language  54
Ethical Considerations  55
Procedure  55
Statistical Analyses  55
Descriptive Statistics  55
t-test  56
Pearson’s Product Moment Coefficient of Correlation  56
Regression Analysis: Hierarchical and Moderated  56

RESULTS

Descriptive Statistics  57
Graphical representation of Stressful Life Events among females and males  58
Gender Differences  61
Correlations  62
Regression Analysis  65
Hierarchical Regression Analysis for females and males  68
Moderating Factors  75
Plotting Interactions  75
Simple Slope Analysis  76
Social Support as a moderator  76
PsyCap as a Moderator  81
DISCUSSION

Discussion of the Findings
Gender Differences
Predictors of Life Satisfaction
Predictors of Depressive Symptoms
Moderators of Life Satisfaction
Moderators of Depression
Conclusion
Implications
Limitations and Suggestions
References

APPENDICES

Personal Data Sheet (Appendix-A)
Life Events Questionnaire (Appendix-B)
Weights of Stressful Life Events (Appendix-C)
Multidimensional Scale of Perceived Social Support (Appendix-D)
Brief Psychological Capital Questionnaire (Appendix-E)
Satisfaction with Life Scale (Appendix-F)
Cesd-Scale (Appendix-G)
Kashmiri Versions (Appendices-H-M)
Urdu Versions (Appendices-N-S)
Confirmatory Factor Analysis of Brief Psychological Capital Scale (Appendix-T)
Simple Slope/Post-Hoc Regressions Analyses (Appendices-U-Z)
Published Papers
