EDITORIAL

Teachers are the backbone of the education system and play a crucial role in shaping the career and life of children. The availability of well qualified, competent and committed teachers is the key to enhance the quality of education. Therefore, investment in effective teacher education and professional development of teachers can improve the standard of education and can bring in reforms in the system. Research can promote the scholarship and scientific outlook of teachers in a knowledge era. Teachers should be encouraged to undertake research.

The articles in the journal deal with the role of the students, research scholars and teachers with regard to Social intelligence and Communicative behavior, Self-concept and Teaching Competency, job stress of primary school teachers, profession among B.Ed. students, we assure that these articles will be creating opportunities for research on teaching and learning process.

Thanking you.
