## List of Figures

1.1 System diagram and service platform of a WBSN for wireless telemedicine  
2.1 A multi-hop data transmission scenario in WSN.  
3.1 System diagram and service platform of a WBSN for wireless telemedicine.  
3.2 Block diagram of K-Means as a clustering and ID3 learner as a classification to predicts the risk level from the stream data.  
3.3 Flow diagram of proposed approach.  
3.4 Graphical Representation of accuracy, TPR and FPR of HR  
3.5 Graphical Representation of accuracy, TPR and FPR of SpO2  
3.6 Graphical Representation of accuracy, TPR and FPR of ABPS  
3.7 Graphical Representation of accuracy, TPR and FPR of ABPD  
3.8 Graphical Representation of Running Time Complexity, Average SSQ, and Memory Utilization for window size of 10 and 15  
4.1 Typical sensor network arrangement  
4.2 Flowchart for the Mobile Node Scheme  
4.3 Flowchart for AFRC Algorithm  
4.4 Flowchart for Congestion Detection Algorithm  
4.5 Flowchart for Proposed Protocol  
4.6 (a) Total Energy Consumption Vs Node Density; (b) Average Energy Consumption Vs Node Density; (c) Average Energy Consumption Vs Packet Size.  
4.7 (a) Average Energy Consumption Vs RR; (b) Average Energy Consumption Vs Simulation Time; (c) Average Energy Consumed Vs No. of Mobile Node.  
4.8 Fairness Index Vs No. of Mobile Nodes  
4.9 PDR, PLR, Throughput for 4 Distinct Test Cases  
4.10 Rate of Energy Consumption in 4 Distinct Test Cases  
4.11 Energy Consumption Speed of Each Node  
4.12 Lifetime of the Intended Node  
5.1 Analysis of Network Lifetime
