

A C K N O W L E D G E M E N T

It gives me immense pleasure to express my deep sense of gratitude to Dr. T.P. Singh, Reader, Department of Agronomy, A.S. (P.G.) College, Lakhaoti (Bulandshahr), who suggested the problem and encouraged me in the conduct of this study. But for his valuable and painstaking guidance, and day to day suggestions, it would not have been possible to complete this investigation. I am also grateful to him for his untiring help and useful criticism in preparation of this manuscript.

A debt of appreciation are also owed to Dr. Harbir Singh, Dr. S.P. Singh and Dr. Sataya Narayan, Department of Agronomy for their sincere and valuable advice from time to time.

I will be falling in my duty if I do not record my indebtedness and heartest sence of gratitude to my parents for providing the moral and financial support and constant encouragement necessary for completion of this manuscript.

Finally, I am also grateful to the principal of the college and F.S. for permitting the research work and arranging necessary facilities required during the course of investigation.

Date : 4/9/55
