Table of Contents

Table of Contents..............................................................................................................i-ii
List of Tables......................................................................................................................iii-v
List of Figures......................................................................................................................vi-viii
Abbreviations.....................................................................................................................ix-xi

Chapter 1 General Introduction......................................................................................1-6

Chapter 2 Review of Literature......................................................................................7-25
  2.1 Molecular basis of cancer
  2.2 Targets of cancer therapy
  2.3 Oxidative stress in cancer
  2.4 Plants as anticancer agents
  2.5 Selection of plants for anticancer activity
  2.6 References

Chapter 3 Aim and Objectives.........................................................................................26-27
  3.1 Research gaps identified
  3.2 Aim
  3.2.1 Objectives

Chapter 4 Phytochemical evaluation, antioxidant activity, and HPTLC studies...........28-48
  4.1 Introduction
  4.2 Materials and Methods
  4.3 Results and Discussion
  4.4 References

Chapter 5 Bioactivity-guided fractionation of selected plant fractions.................49-108
  5.1 Introduction
  5.2 Materials and Methods
5.3 Results and Discussion

5.3.1a Memecylon umbellatum

5.3.1b Nardostachys jatamansi

5.4 References

Chapter 6 In vivo anticancer activity

6.1. Introduction

6.2. Material and Methods

6.3. Results and Discussion

6.4 Summary of in vivo activity

6.5 References

Chapter 7 Mechanistic evaluation of selected sub-fractions/isolated compounds

7.1. Introduction

7.2. Materials and Methods

7.3. Results and Discussion

7.4 Summary of mechanistic evaluation

7.5 References

Chapter 8 Summary and Conclusions

References
