Acknowledgement

I would like to thank all the people who contributed in some way to the work described in this thesis. My hearty thanks to Manipal Academy of Higher Education for encouraging research students by supporting from the structural Ph.D. Program. First and foremost, my profound gratitude goes to my advisor, Dr. Sudha Warrier, Associate professor, School of Regenerative Medicine for accepting me into her group and her invaluable guidance throughout this research. Her dynamism, vision, sincerity and motivation have deeply inspired me. She has taught me the methodology to carry out the research and to present the research works as clearly as possible. It was a great privilege and honour to work and study under her guidance.

I am incredibly grateful to my parents (K. Gurubharathi, G. Nagarani) for their love, prayers, caring and sacrifices for educating and preparing me for my future. I am very much thankful to my husband (Sentthil Padmanaban DG) for his love, understanding and continuous support to complete this research work. Also, I express my thanks to my brother (G. Girikrishna) for his moral support and valuable prayers.

I would like to thank my doctoral committee members, Prof. Anjan Das and Dr. Gautham Sethi for their interest in my work and their constant encouragement. I express my special thanks to Prof. Arun Dharmarajan, Curtin University, Perth, Western Australia, for his genuine support throughout this research work. Again, with a special mention to Prof. Arun Dharmarajan for providing me an expensive chemicals and kits that helped to improve my research. I would also like to mention that his valuable comments and suggestions on my research was very valuable. I am also thankful to Dr. Alan Prem Kumar, Department of Pharmacology NUS, Singapore, for his support and collaborative work.

I gratefully acknowledge the Department of Biotechnology (DBT), Government of India for their funding source that made my Ph.D. work possible.
I would like to acknowledge The Dean, School of Regenerative medicine (SORM), Prof. Gopal Pande for his moral support and guidance. My sincere thanks also goes to other Principal investigators/ lecturers of SORM, by names Dr. Jyothi Prasanna, Dr. Anujith Kumar, Dr. D. Anandh, Dr. Indrani Datta Dr. Rajarshi Pal, Shagufta Praveen, Meenal Francis, Suja Ann Mathew for their support and cooperation throughout this research. Also, I would like to thank technical staff of SORM for their immense help at lab routines.

Finally, I would like to share my sincere thanks to my groupmates who supported me during my time here from the beginning- Senthil Kumar, Nitish Rao, Namitha Haridas, Ramya, Sreeja Sekhar, Dipshika Panda, Prethem Srinath, Kriti KB. In addition, my special thanks to my present groupmates Manasi Patil, Naisarg Gamit, Saurabh Mandal, who shared lots of fun and love filled environment during my final stage of Ph.D. My particular thanks to Manasi Patil and Naisarg Gamit for helping me in thesis writing and formatting.

I am indebted to my Ph.D. batch mates, Poulomi Banerjee and Kavina Ganapathy for their valuable help and support. I am extending my thanks to other research students of SORM for their kindness and support during my research work.
