ACKNOWLEDGEMENTS

The author wishes to express her sincere gratitude and indebtedness to Dr. Geeta Talukder, Assistant Professor, Department of Pathology and Bacteriology, Institute of Post-Graduate Medical Education and Research, Calcutta, for her constant guidance and unending encouragement throughout the course of this investigation. Very grateful thanks are also extended to Prof. (Mrs.) Archana Sharma, Professor of Genetics, Department of Botany, University of Calcutta, without whose constant help and sound advice the present work would not have been completed to satisfaction.

The author is also indeed grateful to Prof. K.P. Sengupta, Director, Institute of Post-Graduate Medical Education and Research, and Surgeon Superintendent of S.S. K.M. Hospital for providing necessary facilities, permission to use hospital material, constant encouragement and guidance.

Thanks should also be extended to Dr. S.K. Panja, Department of Dermatology and Dr. J.C. Ghosh, Department of Cardiology of the Institute of Post-Graduate Medical Education and Research, for providing necessary clinical material.

Thanks are also due to the Council of Scientific and Industrial Research, New Delhi, for the award of a
Junior Research Fellowship to the author during the tenure of this work.

Lastly, the kind co-operation and assistance of her friends and colleagues, particularly, Dr. Dipali Dey, Miss Marietta Migli, Mr. H. Som, Mr. S. Dutta, Mr. S. Roy, Mr. A. Sen and Mr. P.K. Gajra are thankfully acknowledged.
