Acknowledgement:

It is the time to convey my utmost gratitude to those without whom the dream of being successful in this journey could not be possible. So this is my golden opportunity to thank you all.

To name first, I am deeply indebted to "Satyandranath Bose National Centre For Basic Sciences" (Salt lake, Sector-III. Block-JD, Kol-98) where I have carried my entire Ph-D work, and to the Director Prof. Arup Roychowdhury for his kind approval to let me get an entry in this respected institute as an external part-time Ph-D candidate providing me all the necessary facilities to pursue my thesis work.

I am very much grateful to the academic authority of the Centre for setting a suitable time table required to continue the "Ph-D course work programme" for working candidates like me. On the other side I am indebted to the members of the administrative office, the Library officials for their keen support and their continual help.

It is my privilege having such a tough and hard taskmaster as my thesis supervisor Prof. Rabin Banerjee. His cheerful and energetic guidance, constant endeavour to the problem has led me to finalise my work at this stage. I consider myself to be fortunate enough to come in contact with such a scientist who, with his encyclopaedic knowledge has introduced me to diverse fields of science during the tenure of my work. His valuable suggestions, criticism and immense encouragement has enriched my journey to reach my goal. I owe to him for the rest part of my life.

I would like to express my sincere thanks to all my fellow mates in this institute for lending me their helping hands whenever needed. Thank you Friends!

I pay my gratitude to my work place "Camellia Institute Of Technology", (Madhyamgram, Kolkata-129) and my heartfelt thanks goes to the Director, Prof. Subhasis Sengupta for his kindness to pursue this Ph-D programme. My heartiest thanks to all my well-wishers and specially my colleagues of Physics Dept. of this college for
Their constant support and help.

This is high time to pay tribute to my teachers I have met since my school days. Down the memory lane I can still recall the vivid moments of my school “Bally Bangasishu(Balika) vidyalaya", our favourite teachers(Mina di, Swapna di, Sumita di, Rina di, Rekha di, Subha di, Sobhona di, Shikha di and so on..!) and very much their genuine loving personality which deserve to be adored. They were my true inspiration to choose teaching as my profession.

My warm regards to the Professors (Late Prof. Amal Kr. Som, Prof. Shukla Mukherjee, Prof. Keka Basu Chaudhuri and so many..) of my Undergraduate College “Brahmananda Keshabchandra College, Bonhoogly” from where I had earned my Bachelors degree in Physics. I pay respect to my private tutor Prof. Basudeb Ghosh (the then professor in the dept.of Physics, Vidyamandir, Belurmath) who specially instilled the aspirations for achieving higher education in this field.

It was the Dept. of Physics of Calcutta University (Rajabazar science college campus) where the spell really came from the awesome teaching of the eminent Professors. Their relentless effort to ease diverse topics to us was truly amazing and unparalleled. And I did aim at Ph-D degree then.

Last but not the least is my Family. My homage to our close family friends Sri Debasish Majumdar and his wife Smt. Mousumi Majumdar for sharing their views, valuable suggestions and showing me the track to opt correct decision at that primary stage. I feel honoured to materialise the wish of my parents Sri Jatindranath Kumar and my mother Smt. Nilima Kumar. I owe very much to my elder sister and brothers for their steady support to finish this mammoth task. I am privileged with the heartfelt blessings from my in-laws.

At the end of this golden opportunity I am left with none but my son Anubhab and my husband Indranath. It is only their tremendous mental support, passion and love that boosted my work to the ultimate destination. So not to utter any word for them, and they know why.

Lastly Thank to the Almighty.
