Acknowledgements

I would like to take this opportunity to express my gratitude to the help and cooperation extended by my friends and well-wishers during the course of my work. First and foremost, I would like to convey heartfelt regards to my mentor Prof. Udayaditya Sen for his untiring cooperation. I have immensely benefited from his flair of innovative thinking, a daring and positive attitude and infinite optimism throughout my tenure in this institute. His worthy suggestions, symbolic optimism and unremitting inspirations have compassed my journey (in the field) to the right direction. Whenever problems engulfed me, his encouragement and guidance have always helped me to find the proper way out. I am deeply obliged to Dr. Jhimli DasGupta for her constant encouragement and kind support during the course of this study. I am also thankful to Prof. Jiban Kanti Dattagupta, Prof. Sampa Biswas and Prof. NitaiPada Bhattacharyya for their assistance. Financial assistance from the Council of Scientific and Industrial Research (CSIR) and laboratory facilities from Saha Institute of Nuclear Physics are acknowledged. I do thankfully acknowledge Seema without whose active support and cooperation this thesis would not have been completed. I would like to thank Bikramda for his excellent technical support. I also thank Bipinda for looking after daily chores in the lab. My sincere thanks are due to all the staff members of the Crystallography and Molecular Biology Division for their generous cooperation. I am gratified to my seniors especially Susmitadi under whose guidance I learned the molecular biology techniques. I would specially like to mention my labmates, Sudipda and Samirda for encouraging me through the highs and lows of my stay in this lab from the very beginning.
Their friendship like attitude shall always be a treasure to me. A special thanks to my labmates Rakhi and Sanghati. Their incredible help during my stay in this lab shall always be carved in my memory. Lastly, I want to heartily thank my family members whose constant support led my path towards this degree. It is ever lasting and I am really happy to dedicate my success to them. I always find myself lucky that I belong to all of them.
