List of the figures	i - viii
List of the tables	ix - xi
Nomenclature	xii -xiii
Chapter I	Introduction and literature survey
1.1	Introduction 1
1.1.1	About Supercapacitor 1
1.1.2	Literature survey of
	a. Cobalt Oxide 5
	b. Manganese doped Cobalt Oxide 11
	c. Ruthenium doped Cobalt Oxide 13
1.2	Statement of the problem 16
	REFERENCES 19
Chapter II	Theoretical background
2.1	Introduction 26
2.1.1	About supercapacitor 26
2.1.1.1	Existing materials of the electrodes 28
	a. Transition metal oxide 28
	b. Conducting Polymers 28
	c. Carbons 29
	d. Composites 29
2.1.1.2	Electrolytes used for electrochemical 29
	characterizations
	a. Organic 30
	b. Inorganic 30
	c. Ionic 30

	d. Solid state electrolyte	31
2.2	Supercapacitors based on double layer	31
2.3	Supercapacitors based on pseudocapacitor	36
2.4	Supercapacitors based on hybrid capacitors	39
2.5	Requirement for electrode materials of supercapacitors	40
2.6	Types of electrolytic devices	40
	a. Symmetric	40
	b. Asymmetric	41
	c. Solid state	41
	REFERENCES	42

Chapter III Experimental

3.1	Introduction	43
3.2	Thin Films	43
3.3	Electrodeposition technique	46
3.4	Different modes of Electrodeposition	49
	a. Potentiostatic	49
	b. Galvanostatic	50
	c. Potentiodynamic	50
3.5	Preparation for film deposition	51
	3.5.1 Selection and cleaning of substrate	51
	3.5.2 Solution preparation	52
3.6	Characterization of the film	52
	3.6.1 Thickness measurement	53
	3.6.2 Structural characterization	53
	3.6.3 Scanning electron microscopy	56
	3.6.4 Field emission scanning electron microscopy	58
	3.6.5 Energy dispersive analysis	59
	a. Wavelength dispersive X-ray analysis	59

b. Energy dispersive X-ray analysis	59
3.6.6 Contact angle measurement	60
3.6.7 Atomic force microscopy	61
3.6.8 Tunneling electron microscopy	62
3.7 Supercapacitive techniques	63
3.7.1 Cyclic voltammetry	63
3.7.2 Chronopotentiometry	65
3.7.3 Electrochemical impedance spectroscopy	66
REFERENCES	68

Chapter IV Synthesis of cobalt oxide thin films by potentiodynamic electrodeposition and their electrochemical characterizations

4.1 <i>Introduction</i>	70
4.2 <i>Experimental</i>	71
4.2.1 Deposition Procedure	71
4.2.2 Characterizations	72
4.2.3 Electrochemical Measurements	73
4.3 <i>Results and discussion</i>	73
4.3.1 Film formation mechanism and reaction	73
Structural, morphological and electrochemical characterizations	
4.4 <i>Effect of different ingredients</i>	74
4.4.1 Thickness variation	74
4.4.2 Structural properties	75
4.4.3 Surface morphological studies	76
4.4.4 Electrochemical characterization	79
4.4.4.1 Cyclic voltammetry	79

4. 5	<i>Effect of molar concentrations</i>	80
4.5.1	Thickness variation	80
4.5.2	Structural properties	81
4.5.3	Morphological analysis	82
4.5.4	Electrochemical characterization	84
	4.5.4.1 Cyclic voltammetry	84
4. 6	<i>Effect of deposition time</i>	85
4.6.1	Thickness variation	85
4.6.2	Structural properties	86
4.6.3	Morphological analysis	87
4.6.4	TEM and AFM Analysis	88
4.6.5	Wettability study	89
4.6.6	Electrochemical characterizations	90
	4.6.6.1 Cyclic voltammetry	90
	4.6.6.2 Chronopotentiometry	91
	4.6.6.3 Stability study	92
	4.6.6.4 Electrochemical impedance spectroscopy	93
4. 7	<i>Effect of annealing temperature</i>	96
4.7.1	Thickness variation	96
4.7.2	Structural properties	97
4.7.3	Morphological studies	98
4.7.4	Wettability study	100
4.7.5	Electrochemical characterization	100
	4.7.5.1 Cyclic voltammetry	100
4. 8	<i>Effect of deposition scan rate</i>	101
4.8.1	Structural properties	102
4.8.2	Surface morphological studies	103
4.8.3	TEM and AFM analysis	103
4.8.4	Wettability study	105

4.8.5	Supercapacitive characterization	106
4.8.5.1	Cyclic voltammetry	106
4.8.5.2	Effect of scan rates	107
4.8.5.3	Effect of electrolytes	108
4.8.5.4	Effect of electrolyte concentrations	109
4.8.5.5	Stability study	110
4.8.5.6	Chronopotentiometry	111
4.8.5.7	Electrochemical Impedance Spectroscopy	112
	REFERENCES	125

Chapter V Synthesis of manganese doped cobalt oxide thin films by potentiodynamic electrodeposition and their electrochemical characterizations

5.1	<i>Introduction</i>	129
5.2	<i>Experimental</i>	130
5.2.1	Deposition procedure	130
5.2.2	Characterizations	131
5.3	<i>Results and discussion</i>	131
5.3.1	Reaction kinetics	131
	Structural, morphological and Electrochemical characterizations	
5.4	<i>Mn (%) incorporated cobalt oxide samples</i>	133
5.4.1	Thickness variation	133
5.4.2	Structural properties	134
5.4.3	Morphological analysis	135
5.4.4	Elemental Analysis	138
5.4.5	Wettability study	139
5.4.6	Electrochemical characterization	139

5.4.6.1	cyclic voltammetry	139
5.5	<i>Effect of annealing temperature</i>	141
5.5.1	Thickness variation	141
5.5.2	Structural properties	142
5.5.3	Morphological analysis	143
5.5.4	TEM, SAED analysis	145
5.5.5	AFM analysis	146
5.5.6	Wettability study	146
5.5.7	Electrochemical characterizations	147
5.5.7.1	Cyclic voltammetry	147
5.5.7.2	Effect of scan rate	148
5.5.7.3	Effect of electrolytes and electrolyte concentration	149
5.5.7.4	Stability study	151
5.5.7.5	Chronopotentiometry	152
5.5.7.6	Electrochemical Impedance Spectroscopy	153
	REFERENCES	160

Chapter VI Synthesis of ruthenium doped cobalt oxide thin films by potentiodynamic electrodeposition and their electrochemical characterizations

6.1	Introduction	163
6.2	Experimental	164
6.2.1	Deposition procedure	164
6.3	Results and discussion	165
6.3.1	Reaction kinetics	165

Structural, morphological and electrochemical characterizations

6.4	<i>Ru (%) incorporated cobalt oxide samples</i>	167
6.4.1	Thickness variation	167
6.4.2	Structural properties	168
6.4.3	Morphological analysis	170
6.4.4	Elemental Analysis	172
6.4.5	Wettability study	173
6.4.6	Electrochemical characterization	173
	6.4.6.1 Cyclic voltammetry	173
6.5	<i>Effect of annealing temperature</i>	175
6.5.1	Thickness variation	175
6.5.2	Structural properties	176
6.5.3	Morphological analysis	178
6.5.4	TEM, SAED and AFM analysis	179
6.5.5	Wettability study	180
6.5.6	Electrochemical characterizations	
	6.5.6.1 Cyclic voltammetry	181
	6.5.6.2 Effect of scan rate	182
	6.5.6.3 Effect of electrolytes	183
	6.5.6.4 Effect of electrolyte concentration	184
	6.5.6.5 Stability study	185
	6.5.6.6 Chronopotentiometry	186
	6.5.6.7 Electrochemical impedance spectroscopy	187

Chapter VII Electrochemical characterizations of supercapacitor device

7.1	<i>Introduction</i>	199
7.2	<i>Experimental</i>	199
	7.2.1 Deposition procedure	199

7.3	<i>Electrochemical characterizations</i>	
7.3.1	Cyclic Voltammetry	199
7.3.2	Stability Study	200
7.3.3	Chronopotentiometry : Charge-Discharge Curve	201
7.3.4	Electrochemical Impedance Spectroscopy	202
Chapter VIII	Summary and conclusions	206
