ACKNOWLEDGEMENTS i-iii

CONTENTS iv-v

LIST OF TABLES vi

LIST OF FIGURES vii

PREFACE viii

1. INTRODUCTION 1-5

2. OBJECTIVES OF THE STUDY 6-7

3. GEOLOGICAL SETTINGS OF STUDY AREA 8-31

   3.1. Gondwana
   3.2. Indian Gondwana
   3.3. Godavari Graben
   3.4. Geology of the study area

4. MATERIAL AND METHOD 32-41

   4.1. Field investigations
   4.2. Laboratory investigations
   4.3. Dispersed organic matter studies

5. REVIEW OF LITERATURE 42-70

   5.1. Survey of previous palynological work on the Late Permian sequences (Lower Gondwana)
   5.2. Survey of previous palynological work on the Mesozoic sequences (Upper Gondwana)

6. SYSTEMATIC PALYNOLOGY 71-118

   6.1. Classification of *sporae dispersae*
   6.2. Systematics and description of *sporae dispersae*

7. PALYNOZONATION 119-136

   7.1. Palynozonation in bore core MJR-13
   7.2. Palynozonation in bore core MJR-11

8. PALYNOSTRATIGRAPHY CORRELATION AND DISCUSSION 137-169

   8.1. Palynostratigraphy and correlation in bore core MJR -13
   8.2. Palynostratigraphy and correlation in bore core MJR -11

[iiv]
8.3. Discussion

9. PALYNOFACIES ANALYSIS 170-202

9.1. Introduction

9.2. Classification of palynological matter (PM)

9.3. Factors affecting characters of sedimentary organic matter

9.4. Depositional environment of bore core MJR-13

9.5. Depositional environment of bore core MJR-11

9.6. Palaeoenvironmental interpretation and discussion

10. CONCLUSIONS 203-204

REFERENCES 205-254
