Acknowledgement

It gives me immense pleasure and a sense of contentment to recollect all the people who helped me during my research work. I am grateful to all of them. First, I humbly bow my head in front of the Almighty for blessing me with health and confidence to carry out this work successfully.

This journey has been a rich experience for my academic and professional career. I am extremely grateful to my supervisor Dr. Mohammad Israr (Principal, Dungarpur College of Engineering & Technology, Dungarpur) who, with his intellectual acumen, perceptive powers and wealth of insight, worked as a catalyst in the conception and completion of this work. I could not have accomplished this thesis without his patient and esteemed guidance and motivation.

I convey my sincere gratitude to Mr. Punit Koradiya, Application Manager, Jyoti CNC Automation Pvt. Ltd. for providing constant guidance in the most profound manner with continuous encouragement and inspiration. I am highly obliged to all his contributions of time, ideas and constructive comments to make the research experience fruitful.

I am thankful to the Principal in-charge Dr. G. J. Vala, Government Engineering College, Rajkot to avail college facility.

I appreciate the co-operation provided by Prof. G. B. Pithva, Head, Mechanical Department, Government Engineering College, Rajkot. I am also thankful to the colleagues of the entire mechanical department for their kind help and moral support during my study. My special thanks go to Prof. B. B. Kuchhadiya Associate Professor, Mechanical Engineering Department Government Engineering College, Rajkot for their guidance throughout the work.

Last but not the least, I express my earnest gratitude for my parents for being an unceasing source of inspiration and energy. I also appreciate the tremendous patience and support of my wife and my daughter. They have nurtured my desire to embark on
a journey of research and provided unconditional love and unending moral support without which it was difficult to complete this work.
