I am extremely grateful to my PhD supervisor Dr. Santhosh Chidangil, Professor and Head, Department of Atomic and Molecular Physics (DAMP), Manipal Academy of Higher Education for giving me an opportunity to work under his guidance. His constant words of support have driven me to work wholeheartedly and shape my attitude toward research. I will forever be in his debt for his encouragement in making me think, act and deliver the solutions to the targets we have set. I am also thankful for his support in creating a stimulating environment in the work place, thus helping me to work in one of the best labs I have seen. His constant guidance to help me meet eminent figures in research has introduced me to the limitless areas of science. I thank him for spending his invaluable time to guide me from the very beginning of my thesis proposal until I successfully completed all my experiments.

I am thankful to Dr. Unnikrishnan V. K. Associate Professor, DAMP, Manipal Academy of Higher Education for exposing me to the nuances of research as a co-guide. The countless discussions on the experiments performed has inculcated logical thinking and also helped me to interpret arduous data. His tireless efforts to resolve the problems and suggest new approaches to perform experiments are dearly appreciated. His suggestions during manuscript preparation and thesis correction have strengthened the quality of my work. In addition to his invaluable insights and suggestions, I am deeply thankful to him for being there for me during all my ups and downs during this Ph.D period.

I express my sincere appreciation and gratitude to the members of Doctoral Advisory Committee (DAC), Dr. Jyothi Laksmi R, Professor, Department of Physics, Manipal Institute of Technology and Dr. Sajan D George (Associate Professor), Dr. Abdul Ajees Abdul Salam (Associate Professor), Dr. Rajeev Kumar Sinha (Associate Professor) of DAMP, Manipal Academy of Higher Education. I am very much thankful to all of them for their suggestions and for showing the right direction from the time of proposal submission to thesis submission.

I am extremely thankful to Manipal Academy of Higher Education for providing the PhD fellowship. Further, I extend my thanks to the Board of Research in Nuclear Sciences (BRNS), Department of Atomic Energy (Government of India) for their financial assistance to procure necessary equipments for LIBS. The proposed PhD work was impossible without the financial support from the above two sources.
I specially thank Dr. Ajithkumar G. A. of Department of Physics and Astronomy, University of Texas at San Antonio, USA for guiding me during the sample preparation. I also extend special thanks to the faculty members at DAMP, Dr. Suresh Kulkarni, Mr. K. S. Choudhari, Dr. Ajeetkumar Patil for their valuable inputs during manuscript preparation. I also thank to Dr. Aseefhali Bankapur and Ms. Surya Harikrishnan for the fruitful time that I spent with them.

My heartfelt thanks go to Rajesh Nayak, junior engineer with whom I spent countless hours in the lab. His valuable assistance and his years of experience with the instrument has been of immense help to complete all my experimental work. He will be in my heart for all the support he showed during my course. I also extend my thanks to other junior engineers Chethan, Vittal, Mahendra and Vinay for making my days in the department memorable. I also thank the office staff of DAMP Poornima, Santhosh and Sandeep for all their assistance during the PhD course.

I have a special place in my heart for Maktum, Samvit, Yogesha, Vanessa and Surekha who became my best friends and have made my life cheerful in Manipal. I also extend my sincere thanks to Dinoop, Shameem, Madhusudhan, Shashikiran, Shilpa, Swati, Deepak, Shivanand, Reena, Ajay, Antony, Uday, Praveen, Ravishankar, Prajak, Aylin and Devaraj for all the best moments we spent in Manipal.

The most important line of credit goes to my family members. I thank Appa (Dad), Amma (Mother), Rajashri (Wife), Prashant (Brother), Pavitra (sister) grandma (Saraswati) and Chandana for their constant support during my Ph.D. I could not have reached this far without their moral support and my life in Manipal went smooth only because of their encouragement. Despite having the distress from the sudden demise of my mother, sister, mama, and Samarth I still see the silver lining with my daughter Saanvi and a special thanks to her for keeping my spirits high.
