

ACKNOWLEDGEMENT

At the time of completion of this thesis, I look over the 6+ years of my Ph.D. and take immense pleasure to acknowledge all those, who have supported me along this long but fulfilling journey.

First and foremost, I would like to express my heartfelt gratitude towards my guide and mentor, **Dr. Shiv K. Sharma**. Your passion for perfect and clean experiment has been inspirational. Our discussions always gave me fresh perspectives towards my work. Thank you for your patience and persistence and for keeping me on track. I hope that I can, in turn, pass on the research values that you have given to me.

I would also like to thank **Prof. Neeraj Jain, Prof. Pankaj Seth** and **Dr. Narender K. Dhingra**, the members of my doctoral committee, whose encouraging and constructive feedbacks helped in shaping my thesis.

I am indebted to **Dr. Subrata Sinha**, Director, NBRC and **Dr. Vijayalakshmi Ravindranath**, Founding-Director, NBRC for providing me the opportunity to work here. The list would be incomplete without **Prof. P. N. Tandon**, Founder, NBRC and a visionary, whom I would always remember for his endless enthusiasm and scientific inclination. I would also like to thank all the faculty members of NBRC and their respective labs for sharing their resources.

I owe special thanks to the Administration, Finance, Imports and DIC personnel for their tremendous help over all these years. I wish to thank Dr. Inderjeet Yadav and his personnel for expertly managing animal house facilities.

This thesis is a compilation of studies that were performed at the National Brain Research Centre, Manesar, during 2008-2014. I am indebted to National Brain Research Centre (NBRC), Manesar and the Council for Scientific and Industrial Research (CSIR), India, for financially supporting me during this tenure.

I appreciate the past and present lab members for their excellent camaraderie and support. I am grateful to **Chinmoyee Maharana Lenka, Shilpa Mishra Shukla** and **Kaushik Sharma**, who made my graduate days a learning experience. I also acknowledge my wonderful juniors – **Kautuk Kamboj, Apurva Agrawal, Biswaranjan Sahoo, Tushar Arora** and **Richa Awasthi**, who were always there whenever I needed them. Thanks for helping me with thesis editings. It was a pleasure to work alongside other past lab members like **Vivek Mahadevan, Prakash Mishra, Soumee Bhattacharya, Priti Yadav** and **Jeet Bahadur Singh**, and numerous summer and rotation students who came to the lab. The assistance provided by **Mr. Narayan** is highly appreciated.

On a personal note, I thank **Bandhan Mukherjee** for the later part of my work and standardization of object recognition task discussed in this thesis. It would not have been possible without your untiring efforts in figuring out the nuances of the task. You contributed significantly in your own ways in making the last stretch of my Ph.D., easier and productive.

Time at NBRC was made enjoyable, in large part, due to friends like – **Shalaka Mulherkar, Nitin Koul, Sourav Ghosh, Sriya Bhattacharya, Atul Gopal, Ruchi Ghildiyal, Piyushi Gupta, Sarfaraz Nawaz, Shammi More** (roommate), **Teesta Naskar, Sayali Ranade, Ajit Ray, Apoorv Sharma** and **Guncha Bhasin**. **Vivek Tripathi** bhaiya needs a special mention for his overall support and generous help during thesis preparation. Special thanks to **Ravinder Kumar** (Monu).

True friendships are tested with the course of time and I am happy to earn company of some fantastic people – **Deobrat Dixit, Shailendra Mani, Shaifali Jain, Avinash** and **Deepa**. On a personal note, I extend my gratitude to Deobrat, who kept reminding me that there is a world outside of the lab, and for balancing fun with work. Thank you so much for being there. My long-time buddies – **Kanta Singh, Shonit Singh** and **Sonali Parashar** need a special mention. You all have stood there through thick and thin; like my second family. Thank you so much guys for understanding that sometimes “rats” come before friends.

Though this life is not enough, I grab this opportunity to express my gratitude towards my parents – my mother, **Mrs. Lalita Pandey** and my father, **Late Rama Shankar Pandey**, who showed unflinching faith in me even during some of the worst moments of their lives. Your love always fuelled me with the inspiration to move ahead. It was my father’s wish to see me with a doctorate degree. It is to him that I dedicate this thesis.

I feel highly indebted to my younger brother, **Prabhat**. Thank you so much for sharing my responsibilities and providing me the most conducive atmosphere to complete my research work. It would not have been possible without you.

Last but not the least, I thank everyone who helped me in this endeavour. I apologize for those, whose names may not have figured in this script.

Kiran

Dedicated to my parents

In the loving memory of my Father
