ACKNOWLEDGEMENT

To God, guide and guardians

In the course of the research work, I have been fortunate to interact with learned intellectuals, teachers, peers and colleagues to whom I owe sincere sense of gratitude. With humble supplication and obeisance, I express my deepest gratitude to the Almighty for helping me succeed and accomplish this study through an enriching journey. It is with respect and reverence, I express my sincerest thanks to my supervisor, Dr. Vandana Sharma, for honing and refining my skills so I can stand the test of a thorough research. It is owing to her unstinted mentorship, diverse expertise and enthusiasm that I have been able to accomplish the rigorous odyssey of research in a most enlightening and illuminating manner. I am thankful in earnest to my parents, Gurdeep Singh Bijral and Gurinder Kaur Bijral, for bearing my tantrums with a smile and encouraging me whenever I was dejected while ensuring I stayed on the track towards a successful accomplishment of the research. I am also thankful to my brother, Mustaq Singh Bijral, an alumnus of IIT Kharagpur, who would on a regular basis interact, share and give inputs on my research while balancing his approval and criticism to encourage me through the course. I also wish to express my sincere gratitude to June Edvenson, Alison Brook, Susan Greene, Brenda Greene and Vinton Rafe Mc Cabe for their most insightful comments and observations during the course of the research. Finally but most significantly I owe my thanks to Simranpreet Kaur for her diligent scrutiny of my research and her most valuable inputs, to Kamaldeep Kaur for encouraging me like a big sister, to Subah Gautam for her refreshing friendship that has surely served to enrich as well as delight the passage of my research, to Palvi Gupta who despite being a scholar of Department of Physics, has always been eager and forthcoming to interact with me during the course of my research and finally to Siddhant Sharma from Electronics and Comm. Engg. Dept. for his technical know-how during the research.

Once again, I am most genuinely thankful to God, my erudite mentor, my loving parents, beloved brother and supportive colleagues and friends.

Quleen Kaur Bijral
