

# CONTENTS

	TOPIC	PAGE NO
<b>Chapter-I</b>		
	Introduction	1
	Synthesis and characterization of metallo dyes	6
	Colour and constitution	18
	Valence bond theory of colour	23
	Classification of dyes	27
	Scope of the present investigation	31
<b>Chapter-II</b>		
	Synthesis of metallodyes	38
	Synthesis of lead complexes	39
	Synthesis of lead complex of Amaranth	39
	Synthesis of lead complex of Methylene blue	39
	Synthesis of lead complex of Remazol red B	39
	Synthesis of lead complex of Golden yellow HER	40
	Synthesis of cobalt complexes	40
	Synthesis of cobalt complex of Amaranth	40
	Synthesis of cobalt complex of Methylene blue	41
	Synthesis of cobalt complex of Remazol red b	41
	Synthesis of cobalt complex of Golden yellow her	41
	Synthesis of nickel complexes	42
	Synthesis of nickel complex of Amaranth	42
	Synthesis of nickel complex of Methylene blue	42
	Synthesis of nickel complex of Remazol red B	43
	Synthesis of nickel complex of Golden yellow HER	43

Synthesis of copper complexes	44
Synthesis of copper complex of Amaranth	44
Synthesis of copper complex of Methylene blue	44
Synthesis of copper complex of Remazol red B	44
Synthesis of copper complex of Golden yellow HER	45

### **Chapter-III**

Instrumental techniques and structural aspects of dyes and its complexes	49
Fourier transforms infrared (FTIR) spectroscopy	49
Ultraviolet-visible spectra	50
EPR spectra	51
Structure of the complexes	51

### **Chapter-IV**

Scanning electron microscope with energy dispersive X-ray spectrometer (SEM with EDS)	67
Introduction	67
EDS analysis	68

### **Chapter-V**

Ultrasonic studies of dyes	79
Measurement of density	81
Ultrasonic velocity (u)	82
Adiabatic compressibility ( $\beta$ )	82
Ultrasonic studies	84
Cyclic voltametric studies of metallo dyes	87
Summary and conclusion	135
