ACKNOWLEDGEMENT

I am extremely happy in expressing gratitude to the Lord God Almighty. It is with His blessings this work has become successful.

For the successful completion of this research work, many personalities have extended their expertise and experience.

Primo, I desire to place on my record my sincere thanks to my research supervisor Dr. K. Duraiswamy, Principal, K. S. R. College of Technology, Tiruchengode, Tamilnadu, India, for his invaluable academic advice and for his subtle direction of my efforts throughout the preparation of this thesis. Gratitude is also due to him who provided both insights into the topic and technical guidance in its compilation. Because of his guidance and open mind, I have been able to make my dream come true of combining two fields Digital Image Processing and Gemology together to write this thesis.

My deep sense of respect and gratitude goes to Lion. Dr. K.S. Rangasamy, Chairman, K. S. Rangasamy Group of Institutions, for granting me an opportunity to do this research work, and complete the thesis in a successful manner.

It is unimaginable that an academic effort of this magnitude could successfully come to fruition without the help of Mr. S. E. Nandagopal, a renowned diamond trader and Gemologist in Salem, Tamilnadu, India. The work would not have been possible without his support. I thank him for being instrumental in not only providing the materials but also for providing invaluable suggestions.

My special and sincere thanks to Dr. A. Shanmugasundaram, Chancellor, and Thiru. J. Satheesh Kumar, Vice-Chancellor, Vinayaka Mission’s Research Foundation Deemed University, Salem, Tamilnadu, India, for their blessings and encouragement.

It is a great pleasure to express my sincere thanks to Dr. A. Krishnan, Principal, R. R. Engineering College, Tiruchengode, and Dr. K. Thyagarajah, Principal, P.S.N.A.College of Engineering and Technology, Dindigul, for their motivation and valuable guidance.
I would like to acknowledge the contribution of a number of jewelers who have volunteered in assisting my work.

I am particularly grateful and ever-thankful to my beloved father Dr. K. Rajendran, and my mother Mrs. R. Rani for their commitment to contribute whatever was asked of them, and for their patience and understanding.

I thank my husband Mr. K. Balanaga Gurunathan for his invaluable help, support, motivation and encouragement he has offered to me in the course my thesis preparation.

My thanks are due to Mr. M. Sethuraman, Prop. M/s. Anuradha Agencies, Kumbakonam, Tamilnadu, India, for the help and support rendered to me.

Last but not the least, I would like to thank all people who supported me and were involved in one way or another in the preparation of this thesis.
