

ACKNOWLEDGEMENT

Any success requires the effort of many people and my thesis work is no different.

I feel myself fortunate in having the privilege to express my deep sense of gratitude and indebtedness to my supervisor Prof. M. K. Naskar and Dr. Utpal Biswas for developing the concepts related to the subject of Wireless and Mobile Systems and providing fruitful suggestions. Their ideology, guidance and encouragement in systematic completion of my thesis would inevitably reflect like a mirror in all steps of my career.

I would like to thank Prof. Iti Saha Misra, H.O.D and Prof. Subir Kumar Sarkar, and Prof. B. Gupta, and Prof. S. Sanyal, Department of Electronics and Telecommunication Engineering, Jadavpur University. I also want to take the opportunity to thank Prof. D. R. Poddar for his encouragement. I would like to thank Prof. Amit Konar for his suggestion and encouragement. I cannot forget the help of all the people associated with Advanced Digital and Embedded Systems Lab. of Jadavpur University.

I want to thank all the faculty and staff members of the Computer science & Engineering and Electronics and Communication Engineering Department, NIT Durgapur. I would also like to show my great appreciation to all teachers who taught me right from school to university level.

I would like to convey my thanks to all of my friends, especially Mr. Swarup Mitra for sharing knowledge whenever required. I would also like to convey my thanks to Dr. Jishan Mehedi , Shubhajeet Chatterjee, Arnab Raha, Sumon Kr. Bose, Shaik Sahil Babu, Shovan Maity, Tapas Jana, Jayanta Kumar Bag, Ramesh Jana and Samir Biswas for their support and encouragement. I am also thankful to Dr. Surendra S. Dalu for his suggestion and encouragement. The words of thanks are only a token of my true appreciation for all they have done to make my thesis in the present shape.

Last but not least; I am grateful to my family members and near and dear ones for their blessings and support.

DEBABRATA SARDDAR
