Memory and language is a gift of God, as even a minor damage to it affects the entire communication. It’s here that I would like to specially thank all those who, by each moment are forgetting or failing to express their wonderful memories of life...! My work and efforts would yield no outcome if those “special friends” would not have ‘willing’ cooperated to be my participants for the study. All the participants gifted me immense knowledge, which no theory classes can provide! My sincere gratitude to all the various professionals, homes, clinics, hospitals and institutes in Kerala who willing shared their time to interact with me, accepted my interest and offered their best to help me find and collect information about the participants for the study.

My family has been my great foundation and support. Amma… you are just GREAT!! No word can just describe your love, sufferings and effort you put in helping me with my thesis. Loads of gratitude and love to my dearest husband, Tom. Your role in the completion of my thesis is colossal. Your efforts, time, thoughts, materials, and criticisms has paved way to the completion of this work.
