Chapter V

V.1 Tamilnadu - Geology
V.1a Tamilnadu - Sathiamangalam supergroup
V.2 Erumaipatti watershed - Geology

Chapter VI

VI.1 Drainage network
VI.2 Regression of number of stream segment on Stream order
VI.3 Regression of log of stream segment length on stream order
VI.4 Composite profile of stream segments of five orders
VI.5 Hypsometric analysis

Chapter VII

VII.1 Isopleth of Weathered zone thickness
VII.2 Observation well locations
VII.3 Average yearly water level 1971-'97
VII.4 Monthly average water level 1971-'97
VII.5 Hydrograph of Singiliankombai observation well
VII.6 Hydrograph of Erumaipatti observation well
VII.7 Water table - July '99
VII.8 Water table - May '98
VII.9 Water table - Nov '97
VII.10 Depth to water level - Nov '97
VII.11 Depth to water level - May '98
VII.12 Depth to water level - July '99
VII.13 Water level fluctuation November '97 - May '98
VII.14 Water level fluctuation Nov '97 - July '99
VII.15 Water level fluctuation correlation
VII.16 Rainfall Vs water level - Erumaipatti PWD well
FIGURES

VII.17 Rainfall Vs water level - Erumaipatti observation well
VII.18 Rainfall Vs water level - Singilankombai observation well
VII.19 Geomorphologic unit Vs Average water level
VII.20 Stream order Vs Average water level
VII.21 Stream order Vs Average water level and weathered thickness
VII.22 Average weathered thickness Vs Average water level
VII.23 Open well aquifer Vs yield characteristics
VII.24 Relationship between weathered thickness and specific yield
VII.25 Permeability Vs full recovery
VII.26 Transmissivity Vs specific capacity
VII.27 Iso 'T' value - borewell
VII.28 Iso 'K' value - openwell

Chapter VIII
VIII.1-10 Electrical resistivity VES curve interpretation
VIII.11 Geo-electric section along NE - SW direction
VIII.12 Geo-electric section along W - E direction
VIII.13 Iso resistivity - 5m depth
VIII.14 Iso resistivity - 20m depth
VIII.15 Iso resistivity - 40m depth
VIII.16 Iso resistivity - 80m depth
VIII.17 Observed 'T' Vs calculated 'T'
VIII.18 Longitudinal conductance Vs 'T' calculated
VIII.19 Longitudinal conductance Vs 'T' observed
VIII.20 Magnetic intensity
FIGURES

VIII.21 Magnetic intensity profile - SW - NE direction
VIII.22 Magnetic intensity profile - W - E direction

Chapter IX
IX.1 Schoeller diagram for November '97
IX.2 Schoeller diagram for May '98
IX.3 Schoeller diagram for August '99
IX.4 Electrical conductivity - Aug '99
IX.5 Electrical conductivity - May '99
IX.6 Electrical conductivity - Nov '97
IX.7 Conductivity Vs Chloride for November '97
IX.8 Conductivity Vs Bicarbonate for November '97
IX.9 Conductivity Vs Total hardness for November '97
IX.10 Conductivity Vs Ca, Na and Mg for November '97
IX.11 Conductivity Vs Chloride for May '98
IX.12 Conductivity Vs Bicarbonate for May '98
IX.13 Conductivity Vs Total hardness for May '98
IX.14 Conductivity Vs Ca, Na and Mg for May '98
IX.15 Conductivity Vs Chloride for August '99
IX.16 Conductivity Vs Bicarbonate for August '99
IX.17 Conductivity Vs Total hardness for August '99
IX.18 Conductivity Vs Ca, Na and Mg for August '99
IX.19 Piper diagram for November '97
IX.20 Piper diagram for May '98
IX.21 Piper diagram for August '99
IX.21a Schematic representation of chemical evaluation of ground water
IX.22 Wilcoxon diagram for November '97
FIGURES

IX.23 Wilcox diagram for May '98
IX.24 Wilcox diagram for August '99
IX.25 Corossivity Index - Aug '99
IX.26 Corossivity Index - May '98
IX.27 Corossivity Index - Nov '97
IX.28 Gibb's plot for November '97
IX.29 Gibb's plot for August '99

X.1 Ground water potential status - July '97
X.2 Ground water potential status - May '97
X.3 Ground water potential status - Nov '97
X.4 Recharge - Discharge area - Jun '97
X.5 Recharge - Discharge area - May '98
X.6 Recharge - Discharge area - July '99
X.7 Yearly average rainfall and runoff
X.8 Monthly average rainfall Vs runoff
X.9 Rainfall-runoff relationship under different AMC
X.10 Polynomial correlation between rainfall & runoff
X.11 Relationship between rainfall, runoff and infiltration
X.12 Hydrograph of Erumaipatti observation well
X.13 Safe yield determination - Harding method
X.14 Ground water balance

Chapter XI
XI.0 Flow chart showing data flow and analysis in GIS
XI.1 Ground water potential zones
XI.2 Area suitable for artificial recharge structures - I
XI.3 Area suitable for artificial recharge structures - II
