LIST OF FIGURES

1. Lysine biosynthetic pathway in lysine over-producing bacteria
2. Calibration curve for estimation of L-lysine
3. Calibration curve for estimation of α-alanine
4. Calibration curve for estimation of lysine by microbiological assay
5. Calibration curve for estimation of DAP
6. Calibration curve for protein estimation
7. Calibration curve for glucose estimation
8. Growth and lysine production in various media by the isolate Lb
9. Growth and lysine production in various media by the isolate 2Fa
10. Changes in the medium by the isolate Lb
11. Changes in the medium by the isolate 2Fa
12. Effect of controlling pH of the medium on the isolate Lb
13. Effect of controlling pH of the medium on the isolate 2Fa
14. DAP-decarboxylase activity of the selected isolates
15. Microbiological assay curves of authentic and isolated samples of lysine
