CONTENTS

List of Figures i - vi
List of Tables vii
List of Plates viii

CHAPTER - I
INTRODUCTION

1.1 General 1
1.2 Previous Studies 3
  1.2.1 Previous Studies in Landslide 3
  1.2.2 Previous Studies in Study Area 13
1.3 Ethics of the Present Study 14
1.4 Methodology 15
1.5 About the Study Area 16
  1.5.1 Location 16
  1.5.2 Administrative setup 17
  1.5.3 Climate and Rainfall 17
  1.5.4 Hill Ecosystem of the Shevaroy Hills 17
  1.5.5 The Shevaroy Hills – Regional Perspectives 18
  1.5.6 Prospects 22
  1.5.7 Problems 23
1.6 Aims and Objectives 24
1.7 Synthesis 24
CHAPTER — II

DIGITAL IMAGE PROCESSING

2.1 Introduction

2.1.1 Image Rectification and Restoration

2.1.2 Image Enhancement

2.1.3 Image Classification

2.1.4 Data Merging and GIS Integration

2.2 Statistical Analysis in Image Processing

2.3 Radiometric Enhancement

2.3.1 Contrast Stretch

2.3.2 Histogram Equalization

2.4 Spatial Enhancement

2.4.1 Filtering in Spatial Domain

2.4.2 Resolution Merge

2.4.3 Edge detection / Enhancement

2.5 Spectral Enhancement

2.5.1 Principal Component Analysis (PCA)

2.5.2 Decorrelation Stretch

2.5.3 Tasseled Cap Transformation

2.5.4 Hue Saturation and Intensity Transformation

2.5.5 Indices

2.6 Synthesis
CHAPTER – III
EVALUATION OF TERRAIN SYSTEMS/PARAMETERS

3.1 General 50

3.2 Lithology 52
   3.2.1 Charnockite 52
   3.2.2 Epidote Hoblende Gneiss 53
   3.2.3 Laterite 54

3.3 Structure 55
   3.3.1 Structural Trends 55
   3.3.2 Lineaments 56
      3.3.2.1 Lineament Mapping 56
      3.3.2.2 Lineament Density 56

3.4 Geomorphology 57
   3.4.1 Tectonic Geomorphology 57
      3.4.1.1 Crestline 57
      3.4.1.2 Plateau 58
      3.4.1.3 Escarpment 58
      3.4.1.4 Tectonic Valleys 59
      3.4.1.5 Slopes 59
         3.4.1.5.1 Active and Passive Slopes 59
         3.4.1.5.2 Shallow – Moderate – Steep Slopes 60
         3.4.1.5.3 Concave – Plain – Convex – Slopes 60
         3.4.1.5.4 Dissected – Undissected Slopes 60
         3.4.1.5.5 Integrated Slope Morphometry 61
3.4.2 Denudational Geomorphology
3.4.2.1 Distribution of Palaeoscars 63
3.4.2.2 Degree of Weathering 63

3.4.3 Fluvial Geomorphology 63
3.4.3.1 Drainage Architecture 64
3.4.3.2 Drainage Density 64
3.4.3.3 Drainage Pattern 64

3.5 Landuse and Landcover 64
3.6 Relief 65
3.7 Soil Type 65
3.8 Rainfall 66
3.9 Synthesis 66

CHAPTER - IV
TERRAIN SYSTEMS AND LANDSLIDES

4.1 General 67
4.2 Lithology and Landslides 68
4.3 Lineaments and Landslides 69
4.3.1 Lineament Density and Landslides 69
4.4 Tectonic Geomorphology and Landslides 70
4.5 Tectonic Slopes and Landslides 71
4.6 Denudational Geomorphology and Landslides 72
4.6.1 Degree of Weathering (Regolith cover) and Landslides 72
4.7 Fluvial Geomorphology and Landslides 73
4.7.1 Drainage Density and Landslides 73
