ACKNOWLEDGEMENT

A journey is easier when you have the support of your loved ones. This thesis is the result of my research work whereby I have been accompanied and supported by many people. It is the right time and pleasant aspect that I express my gratitude towards all of them.

I would like to thank all the people who supported me and were involved in one way or another in the preparation of this thesis. With the biggest contribution to this thesis, I would like to thank my thesis supervisor Prof. Mushahid Husain, Jamia Millia Islamia, New Delhi and co-supervisor Dr. D. K. Avasthi, Inter University Accelerator Centre, New Delhi, for their immense help in planning and executing the work in time. The confidence and dynamism with which they guided the work requires no elaboration. Their valuable suggestions as final words during the course of work are greatly acknowledged. What I know today about the process of research, I learned from my supervisors.

I am very grateful to Dr. D Kanjilal, Director, Inter University Accelerator Centre, New Delhi, Dr. Mohammad Zulfequar, HOD, Department of Physics, Jamia Millia Islamia, New Delhi and Dr. Harsh, Scientist ‘G’, Retd. Solid State Physics Laboratory (SSPL), New Delhi, for their constructive comments and words of encouragement throughout the course of this work.

My sincere thanks are due to all the colleagues of Materials Science Group for their co-operation and constant encouragement during the course of my beam time experiments and characterizations as well as thesis writing. The co-operation I received from my colleagues at JMI is also deeply acknowledged. I am highly thankful to Dr. Shikha Varma for her help and support during the XPS measurements of the samples. I would never forget the company of my fellow research colleagues and friends. I am thankful to Dr. GBVS Lakshmi, Dr. D C Agarwal, Dr. Avshish Kumar, Dr. S A Khan, Dr. U B Singh, Dr. P K Kulriya, Dr. Tanuj Deswal, Dr. Ravi Kumar and Dr. Javid Ali for their help and co-operation.
My sincere thanks to **Dr. P. Kumar** and **Mr. Kedar Mal** of LEIBF, IUAC for their help and support during the ion beam experiments. I am thankful to **Dr. D Kabiraj** and **Mr. S. R. Abhilash** from target laboratory of IUAC, New Delhi for their help during the ABS experiments performed on my samples.

I would also like to thank **my parents**, who taught me the value of hard work by their own example. I feel a deep sense of gratitude towards my father and mother who formed part of my vision and taught me good things that really matter in life. The acknowledgment is due for my parents-in-laws, **Smt. Asha Karn and Lt. Sh. P N Karn**, who rendered enormous support to me during the whole tenure of my research.

Lastly, but not at the least I am grateful to my husband ‘**Ranjeet**’ for the love, inspiration and moral support he provided me throughout my research work. He stood by me and gave me strength and inspiration to explore new domains and innovative ideas. Without his loving support and understanding I would have never completed my present work. I also thank my sweet daughters ‘**Srishti**’ and ‘**Pragya**’.

Finally, I would like to thank all whose direct and indirect support helped me in completing my thesis in time. The chain of my gratitude would definitely be incomplete if I forget to thank the first cause of this chain, ‘**The Almighty**’. His unseen presence has helped me in making this work see the light of day.

*Indra Sulania*
