Acknowledgements

I am indebted to my revered teacher Dr. S. K. Chatterjee, M.Sc. (Cal.), Ph.D. (U.S.A.), Director Cinchona and other Medicinal Plants, Government of West Bengal, India (Ex-Professor and Head, Department of Botany, Burdwan University, Burdwan, West Bengal, India) for his kind guidance during the tenure of this research programme. He has initiated in me the quest for research in this newer field of developmental physiology of fibre-yielding plants. His valuable guidance, steadfast encouragement and constant inspiration, led me to undertake and complete the present investigation.

I feel obliged to Dr. B. Nandi, Professor and Head, Department of Botany, Burdwan University, for providing me with necessary laboratory facilities.

My sincerest thanks and gratitude are also due to Dr. Subir Sen, Head, Department of Genetics and Plant-breeding, Bidhan Chandra Krishi Viswavidyalaya, Mohanpur, Nadia, West Bengal, India and Dr. S. Gupta, Scientist-in-Charge, District Seed Farm, Nadia, India for supplying me the seeds of Jute and Cotton respectively.

My sincere regards are due to Professor P. N. Bhaduri, Ex-Emeritus Professor, Bidhan Chandra Krishi Viswavidyalaya, Mohanpur, West Bengal for his keen
interest in the work.

I also thankfully acknowledge the help of Dr. A. Shome, Scientist-in-Charge, Department of Genetics and Plant breeding, Jute Agricultural Research Institute, Barrackpore, India during my investigation.

To Dr. M. A. Chowdhuri, Professor in Botany; Dr. K. Gupta, Reader in Botany and Dr. A. K. Mukherjee, Reader in Botany, Plant physiology and Biochemistry Section, Burdwan University, Burdwan I extend my sincere thanks for their valuable suggestions and help in carrying out the research work.

To all my research colleagues who helped me during this study, I extend my gratitude.

Lastly, I express my deepest gratitude to my husband Dr. M. L. Ghosh for his patience and steadfast encouragement during the preparation of the thesis.
