ACKNOWLEDGEMENT

I convey my deepest gratitude and respect to my research supervisor and guide Dr. Anand Ghosalkar. This work would not have been possible without his excellent guidance, expertise, continuous encouragement. He has been a very supportive, patient mentor during all the technical and personal endeavors. He always inspired me to design and conduct my work independently, due to which I could grow into a confidant researcher. He also questioned me constantly to direct and develop critical reasoning and analysis of parallel approaches to the solution. I would also like to thank him for his critical role in preparation of the reports, articles and the thesis. I cannot imagine having accomplished my doctoral work without a mentor as he has been.

I would also like to thank Dr. Aditya Abhyankar, Dean at The Department of Technology, University of Pune for giving us such a platform to pursue doctoral degree which is an important stage of our lives. His ever positive and encouraging talks helped me keep the hope alive irrespective of all the hurdles.

I extend my sincere gratitude to Mr. Pramod Choudhari (Chairman), Praj Industries Ltd., who has set a landmark example in the field of Biofuels for all of us, and provided us with all the resources necessary during this period. I would also like to thank Dr. Pramod Kumbhar (Praj Matrix- R & D Centre of Praj Industries Ltd.) for the excellent research facility to conduct the experimental work.

My special thanks to my committee members, Dr. Jayant Sawant and Dr. Rishi Jain for giving their valuable time to assess my work and reviewing the progress. Their timely suggestions and advice helped me to improve and bring up this work more systematically.
I take this opportunity to thank all my lab members, the attendants at Praj Matrix, for their help and the comfortable work environment. I must acknowledge the Analytical Sciences Department and all its members at Praj Matrix, who consistently provided the technical support for my work. Also, I would like to thank Mr. Siddharth Pal, who always made the corn cob hydrolysate available in the required form and quantities without hesitation. It would have been impossible to stick to the exhaustive timeline of my research without their support.

This journey would not have been possible without the people who have been an integral part of the triumph, my parents, Anuradha and Bhushan Kogje, Ameya and Vrushali Kogje, My Husband, Rohan Kulkarni. Their unconditional love and backing helped me stand up to the challenges at work and personal life. They not only supported me but also bestowed upon enormous trust in my abilities, making me believe and achieve whatever little I could so far. I am also thankful to my in-laws, Kshama and Sudhir Kulkarni for adapting to the needs and taking care backstage for us both, me and my husband, during our doctoral degrees.

I must thank all my Teachers from school to the M. Tech. program, who showed me the path from chaos to the enlightened state of mind. My Friends at work and other friends cannot be thanked enough for their time, patiently listening to whatever I felt, and all those joyful moments to cherish forever. They gave me a happy place to relax, get over all the stress in my mind and keep on working.
