3.6 Typhoid asymptomatic carriers
3.7 Antibiotic sensitivity and resistant pattern of typhoid bacilli
3.8 Plasmid encoded antibiotic resistance and transfer of drug resistance
3.9 Outer membrane protein of typhoid bacilli
3.10 Phylogenetic analysis
3.11 Typhoid vaccine

4. MATERIALS AND METHODS
4.1 Screening of *Salmonella* sp from asymptomatic typhoid carriers
4.1.1 Collection of the sample
4.1.1.1 Composition of Cary-Blair medium
4.1.2 Identification of the *Salmonella* spp
4.1.2.1 Enrichment medium
4.1.2.1.1 Composition of Selenite F broth
4.1.2.2 Differential media
4.1.2.2.1 Composition of Mac Conkey Agar
4.1.3 Selective Media
4.1.3 Identification of the *Salmonella* spp
4.1.3.1 Preliminary test
4.1.3.1.1 Gram’s staining
4.1.3.1.2 Motility test
4.1.3.1.3 Catalase test
4.1.3.1.4 Oxidase test
4.1.4 Biochemical tests
4.1.4.1 Sugar fermentation
4.1.4.2 Indole test
4.1.4.3 Methyl red test
4.1.4.4 Voges – Proskauer test
4.1.4.5 Citrate utilization test
4.1.4.6 Triple Sugar Iron test
4.1.4.7 Urease test
4.1.4.8 H₂S production test
4.1.5 Confirmatory test for identification of S. typhi
4.2 Antibiotic sensitivity test
4.2.1 Antibiotic discs
4.3 Plasmid profile analysis
4.3.1 Preparation of reagents
4.3.1.1 Suspension Buffer (GTE) Solution
4.3.1.2 Lysis buffer
4.3.1.3 Potassium acetate solution 3M (pH 4.8)
4.3.1.4 TE buffer
4.3.1.5 Absolute ethanol
4.3.2 Preparation of bacterial culture
4.3.4 Preparation of agarose gel
4.4 Bacterial conjugation
4.4.1 Luria Bertani (LB) broth
4.5 Induction of mutation on S. typhi isolates
4.5.1 LB composition
4.6 Isolation of DNA from S. typhi wild and mutant isolates
4.6.1 Assessment of DNA purity from S. typhi wild and mutant isolates
4.7 Polymerase Chain Reaction
4.7.1 OmpR gene primers
4.7.2 EnvZ gene primers
4.7.3 dNTPs Mixtures
4.7.4 Taq DNA polymerase
4.7.5 Buffer
4.7.6 MgCl₂
4.7.7 PCR Tubes
4.7.8 Thermo Cycler
4.7.9 Standard PCR Protocol
4.7.10 Component and final concentration
4.7.11 Master Mixing
4.7.11.1 Master Mix
4.7.12 Cycling Parameter Programming
4.7.13 Resolution of amplified DNA fragments by agarose gel electrophoresis
4.8 Purification of amplified OmpR gene product and Gel elution
4.9 Nucleotide sequence of OmpR gene of S.typhi SS 3 and SS 5 isolates
4.10 Phylogenetic analysis on the basis of OmpR gene of SS 3 and SS 5 isolates
4.10.1 TreeTop
4.10.2 CLUSTAL W2
4.10.3 GenBank
4.11 Detection of Vi antigen in S.typhi isolates
4.12 Precipitation test (to confirm the absence or presence of an intra cellular accumulation of Vi polysaccharide) by Counter current immunoelctrophoresis
4.13 Outer membrane protein isolation from *S. typhi* wild and mutated isolates  

4.13.1 Sodium Dodecyl Sulfate – Polyacrylamide Gel Electrophoresis 67  
4.13.2 Preparation of reagents 68  
4.13.2.1 Acrylamide preparation (30%) 68  
4.13.2.2 Lower Tris buffer 68  
4.13.2.3 Upper Tris buffer 69  
4.13.2.4 Ammonium per sulphate preparation 69  
4.13.2.5 Tank buffer preparation (pH - 8.3) 69  
4.13.2.6 Sample buffer 69  
4.13.2.7 Preparation of separating gel (10%) 69  
4.13.2.8 Preparation of stacking gel 69  
4.13.2.9 Staining solution 70  
4.13.2.10 Destaining solution 70  
4.14 Assement of virulence in mice 70  
4.15 Mice immunization 70  

5. RESULTS  

5.1 Incidence of asymptomatic typhoid carriers from various food handlers 72  
5.2 Identification of *S. typhi* isolates 72  
5.3 Bacterial agglutination test for confirmation of *Salmonella* spp 74  
5.4 Antibiotic sensitivity test of *Salmonella* spp isolates 75  
5.5 Antibiotic resistance pattern of the selected representative *S. typhi* isolates 78  
5.6 Bacterial Conjugation of the selected representative isolates of *S. typhi* 80  
5.7 Plasmid profile analysis of the selected representative isolates of *S. typhi* 82  
5.7.1 Plasmid DNA Molecular weight determination of the selected representative isolates of *S. typhi* 82
5.8 Isolation of DNA
5.9 Amplification of OmpR and EnvZ genes encoding the virulence region of S. typhi isolates
5.10 OmpR gene partial sequence
5.11 Phylogenetic Analysis of S. typhi strain SS-3 and SS-5 based on OmpR gene sequence
5.12 Induction of Mutation on S. typhi isolates
5.13 Immunodiffusion analysis of sonicates of S. typhi mutants demonstrates that OmpR is involved in controlling the synthesis of Vi Ag
5.14 Expression and regulations of the porins OmpC and OmpF in the S. typhi isolates
5.15 Phenotypic characterization of S. typhi mutants
5.16 Assessment of virulence in mice
5.17 Mice immunization

6. DISCUSSION
6.1 Incidence of asymptomatic typhoid carriers
6.2 Antibiotic sensitivity of Salmonella spp and resistance pattern of representative S. typhi isolates
6.3 Plasmid profile analysis of the selected representative S. typhi isolates
6.4 Transfer of drug resistance through conjugation by S. typhi representative isolates
6.5 Live Attenuated typhoid vaccines
6.5.1 Amplification of OmpR and EnvZ genes of S. typhi
6.5.2 Phylogenetic analysis on the basis of OmpR gene of S. typhi
6.5.3 Induction of mutation on *OmpR* genes of *S.typhi* 113

6.5.4 Expression of *OmpR* gene in *S.typhi* wild and mutant strains 114

6.5.5 Phenotypic characterization and Immunodiffusion analysis of sonicates of *S.typhi* mutants 115

6.5.6 Assessment of virulence in mice using wild and mutant strains 116

6.5.7 Mice immunization using *OmpR* mutants 116

6.6 Typhoid prevention and control measures 118

7. SUMMARY 119

8. BIBLIOGRAPHY 121
