ACKNOWLEDGEMENT

Several teachers, friends have helped me to make this thesis book in this present format, I owe my sincere gratitude to all of them. Without their help and suggestions I could not have completed this thesis. Their words of encouragement and ideas boosted my confidence and determination to develop patience and consistency that eventually made me to write this thesis. I am indebted to Atomic Energy Regulatory Board, Mumbai, for the financial support which was a boon to my career.

I am extremely grateful to my guide Dr. T. Subba Rao, Scientist-G, BARC Facilities, Kalpakkam, for his motivation, valuable guidance along with constant encouragement and suggestions. The discussions with him during the course of my research provided a great deal of encouragement towards the completion of this work.

I wish to express my thanks to Co-guide Dr. K. Prashanth, Assistant Professor, Department of Biotechnology, Pondicherry University, for allowing me to avail the laboratory and infrastructure facilities at all odd times during the period of my research. His encouragement during the research work has inspired me.

My thesis wouldn’t have existed without the timely help of Sudhir K. Shukla, Scientist-D, BARC Facilities, Kalpakkam, I have no words to convey my thanks to him.

With great gratitude I convey my thanks to Dr. S. Velmurugan, Head, WSCD, BARC Facilities, Kalpakam and Dr. Anisha B. Khan, Dean, School of Life sciences, Pondicherry University, for providing necessary facilities during the course of my Ph.D.
work.

I am deeply indebted to Dr. V.P. Venugopalan, Scientist - H+, Head, BBPS, BARC Facilities, Kalpakkam, for giving me this opportunity and inspiring me to carry out the work. I also thank Dr. N. Arumugam, Professor and Head, Department of Biotechnology, Pondicherry University, Puducherry, for his moral support and constant encouragement to carry out my research work. I thank Dr. K. Jeevaratnam, Professor and Head, Department of Biochemistry and Molecular biology for his encouragement to complete my assignment on time.

I am greatly indebted to Professor S. Jayachandran, for his moral support and constant encouragement.

I am also thankful to Dr. V.S. Sathyaseelan, Scientist - F, BARC Facilities, Kalpakkam for his valuable suggestions. I thank Dr. Rajesh Kumar, Scientist-E, BARC Facilities, Kalpakkam for providing phototrophic granules and Dr. Pushphalatha, Scientist -F, BARC Facilities, Kalpakkam for helping me to utilize irradiation facility. I thank, Kiran Kumar Reddy, Scientist -C, for useful technical discussions.

I am also thankful to all the staff and faculty members of WSCD, BARC Facilities, Kalpakkam and Department of Biotechnology of Pondicherry University, for their suggestions, support, criticism which kept me going in this endeavour.

I am thankful to the staff members of Library, Accounts and Administration, of Pondicherry University for their co-operation. Besides, I am also happy to
acknowledge the co-operation of staff members of Academic Section, Pondicherry University.

I am indebted to thank all of my friends Dr P. Balamurugan, Dr. Anbumani, Dr. Ramesh, Mr. Venkatnarayanan Srinivas, Mr. Gomathi Sankar, Ms. Pradnya Meshram, Ms. Sathya, Ms. Pooja, Mr. Saranathan, Mr. Sudhakar, Mr. Kennedy, Ms. Lalitha, who helped me to frame and execute my Ph.D research work to success.

Last, but not to the least, and most of all I owe my thanks to my parents A. Navamani, C. Arunachalam, and my sister A. Maheshwari, P. Senapathi, S. Devadharsan for their patience and constant support.
