Figure 3.17: Schematic model of hexagonal dumb-bell shaped DGS with trans-metal

Figure 3.18: Frequency response curve of hexagonal shaped DGS with trans-metal

Figure 3.19: Comparison of frequency response curve (S21) of various types of DGS

Figure 3.20: Comparison of frequency response curve (S11) of various types of DGS

Figure 3.21: Schematic (top view) model of band-stop filter with small patch on triangular ring DGS

Figure 3.22: Schematic (top view) model of band-stop filter with small patch on triangular ring DGS

Figure 3.23: Frequency response of band-stop filter

Figure 3.24: E-Field variation of band-stop filter

Figure 3.25: H-Field variation of band-stop filter

Figure 3.26: Schematic model (top view) of low-pass filter with arrow head DGS

Figure 3.27: Schematic model (bottom view) of low-pass filter with arrow-head DGS

Figure 3.28: Frequency response curve of low-pass filter with arrow head DGS

Figure 3.29: E-field variation of low-pass filter with arrow head DGS
Figure 3.30: H-field variation of low-pass filter with arrow head DGS 44

Figure 4.1: Relative Q-factor, insertion loss and size of different resonators 47

Figure 4.2: Magnetic field lines of the resonant mode TE_{01δ} in an isolated Dielectric Resonator 48

Figure 4.3: Different shapes of dielectric resonators 49

Figure 4.4: Coupling between the dielectric resonator and microstrip line 55

Figure 4.5: Dielectric resonator coupled with microstrip line (equivalent circuit) 55

Figure 4.6: Equivalent circuit (assumed to be lossless) 56

Figure 4.7: Simplified equivalent circuit 56

Figure 4.8: Final equivalent circuit of the dielectric resonator coupled with a line 57

Figure 4.9: Magnetic flux linkage of the resonator field into the microstrip line 59

Figure 4.10: Distributed equivalent circuit 61

Figure 4.11: Two dielectric resonators coupled by magnetic dipole moment 62

Figure 4.12 (a): Field pattern of the TE_{01} mode dielectric ring resonator 65

Figure 4.12 (b): Field pattern of the TM_{01} mode dielectric ring resonator 65

Figure 4.12 (c): Field pattern of the HE_{11} mode dielectric ring resonator 65

Figure 4.12 (d): Field pattern of the HE_{21} mode dielectric ring resonator 65

Figure 4.13 (a): Field pattern of TE_{01} mode Dielectric Resonator (E-field) 66

Figure 4.13 (b): Field pattern of TE_{01} mode Dielectric Resonator (H-field) 66

Figure 4.14: Height versus Q-factor (at radius =3.75 mm) 67

Figure 4.15: Height versus frequency (radius =3.75 mm) 67

Figure 4.16: Height versus Q-factor (radius =3.75 mm) 68

Figure 4.17: Radius versus Q-factor (height =3.5 mm) 68
Figure 4.18: Radius versus frequency (height =3.5 mm) 69

Figure 4.19: Radius versus Q-factor and frequency (height =3.5 mm) 69

Figure 4.20: Height versus Q-factor at different radius 70

Figure 5.1: Geometry of dielectric resonator filter 78

Figure 5.2: Schematic HFSS Model of low-pass-band-pass DR filter 78

Figure 5.3: Fabricated model of low-pass-band-pass DR filter 79

Figure 5.4: Frequency response curve of low-pass-band-pass filter (simulated) 75

Figure 5.5: Frequency response curve of low-pass band-pass filter (measured) 80

Figure 5.6: Frequency response curve (S11) simulated and measured results 81

Figure 5.7: Frequency response curve (S21) simulated and measured results 81

Figure 5.8 E-Field distributions 82

Figure 5.9 H-Field distributions 82

Figure 5.10: Geometry of multiband dielectric resonator filter 84

Figure 5.11: Schematic HFSS model of multiband DR filter 85

Figure 5.12: Frequency response curve of multiband dielectric resonator filter 85

Figure 5.13: E-field variation of multiband dielectric resonator filter 86

Figure 5.14: H-field variation of multiband dielectric resonator filter 86

Figure 5.15: Schematic HFSS model of low pass dielectric resonator filter 89

Figure 5.16: Fabricated model of low pass DRF 89
