I. List of Tables i
II. List of Figures ii
III. List of Abbreviations iv
IV. Glossary vi

1. Introduction and Summary of Previous Studies 1
   1.1 Introduction
   1.2 Terminology 3
   1.3 General Objective of the study 3
   1.4 Need for Cost Effectiveness Analysis 4
   1.5 Scope of Study 4
   1.6 Limitations 5
   1.7 Objective of the study 5
   1.8 Review of previous study 5
       1.8.1 Health Technology Assessments 6
       1.8.2 Decision Support System 7
       1.8.3 Economic Analysis 8
   1.9 Research Methodology 11
       General frame base of the study.
       1.9.1 Geographical, climatic, demographic details of the study area 12
       1.9.2 Sample and sampling technique used 13
       1.9.3 Development and administration of the schedule 14
       1.9.4 Variable included in the study and their measurement strategy 14
       1.9.5 Formulation of Hypothesis and the selection of Research design 15
       1.9.6 Statistical technique used 16
       1.9.7 Software for Analysis 16
2 Application Of Health Technology Assessments Through Central Limit Theorem

2.1 Background of the study. 17

2.2 Existing Situation of the problem. 18

2.3 Scope and purpose. 18

2.4 Levels of Health technology assessment 18

2.5 Applying CLT to a hospital health technology assessment problem 19
   2.5.1 The hospital and technology that was evaluated. 19
   2.5.2 Description Of An Intensive Care Unit. 19

2.6 Identification of the Health technology in the Hospital 20

2.7 Utility of the medical device. 21

2.8 Central Limit Theorem. 22
   2.8.1 Application formula of CLT. 23
   2.8.2 Parameters and their meaning. 23
   2.8.3 Calculation of the parameters 24
   2.8.4 Formula Calculation. 25

2.9 Correlation 28
   2.9.1 Coefficient of Correlation 28
   2.9.2 P value 28
   2.9.3 Correlation between length of stay and used medical devices 29

2.10 Multiple Regression Analysis 30
   2.10.1 Data and Variables 30
   2.10.2 Multiple Regression Assumption 31
   2.10.3 Multiple Linear Regression Model 31
   2.10.4 Interval Estimation 32
   2.10.5 Analysis of Variance for Regression 33
   2.10.6 Regression Diagnostics 35
   2.10.7 Multiple Slandered Error of Estimate 35
2.10.8 Significance Test for the Regression Coefficients 35
2.10.9 Hypothesis 36
2.11 Findings using Multiple Regression Analysis 38
  2.11.1 Regression Statistics 38
  2.11.2 Analysis of variance 39
  2.11.3 Parameter Estimates 41
2.12 Test for Normality using Histogram 43
2.13 Analysis and observations 45
2.14 Conclusions 45

3. Cost Analysis and Efficiency Indicators for Health Care

3.1 Introduction 48
3.2 Subjects and Methods 51
  3.2.1 Study Population 51
  3.2.2 Method 51
3.3 Distinct Phases of the study 52
3.4 Allocation of Costs 53
3.5 Cost Categories 53
  3.5.1 Personnel Cost 53
  3.5.2 Diagnostic Cost 54
  3.5.3 Laboratory Cost 54
  3.5.4 Medication Supplies 54
  3.5.5 Laundry services 54
  3.5.6 Infrastructure cost 54
  3.5.7 Other Doctors Charges 54
3.6 Efficiency Indicators 55
  3.6.1 Occupancy Rate 55
  3.6.2 Turnover Rate 55
  3.6.3 Number of ICU patient Days per FTE Physician 55
3.6.4 Hospital Staff 56
3.6.5 Number of FTE staff per Bed 56
3.6.6 Number of Nurses per Physician 56
3.6.7 Number of Admissions per FTE Physician 56
3.6.8 Average Length of Stay By Diagnosis 56

3.7 Statistical Analysis 57

3.8 Disease wise Specific Results 57
3.8.1 Central Nervous System 57
3.8.2 Cardiovascular System 60
3.8.3 Poison 62
3.8.4 Road Traffic Accident 64
3.8.5 Diseases Pertain to Abdomen 66
3.8.6 Head Injury 68
3.8.7 Other 71

3.9 Discussion and Conclusions 72

4. Economic Analysis and Cost Effectiveness Technique 77

4.1 Introduction 77
4.2 Importance of Economic Evaluation 79
4.3 Types of Economic Evaluation 79
4.3.1 Cost-of-illness Analysis (COIA). 79
4.3.2 Cost-minimisation Analysis (CMA). 79
4.3.3 Cost-effectiveness Analysis (CEA). 80
4.3.4 Cost-utility Analysis (CUA). 81
4.3.5 Cost-benefit Analysis (CBA). 82

4.4 Samples and Methods 82
4.5 Determining Costs 83
4.6 Determining Outcomes 86
4.6.1 Quality adjusted life years (QALYs) 87
4.6.2 Role of QALY's 87
4.6.3 Measurement Criteria of QALY's  
4.6.4 QALY's Methods  
4.7 Standard Probabilities  
4.8 Calculation of QALY  
4.9 Application of QALYs in the economic analysis of health-care.  
4.10 Cost-Effectiveness Analysis  
4.11 Technical Efficiency  
4.12 Decision Analysis Model  
4.13 Discussion and Outcomes of the study  

5. Multiple Regression Model  
5.1 Introduction  
5.2 Sample and Methods  
5.1.1 Sample  
5.1.2 Use of services  
5.3 Data and Variables  
5.4 Multiple Regression  
5.5 Analysis of cost data  
5.6 Multiple linear regression models  
5.6.1 Durban-Watson Test for Auto Correlated Residuals  
5.6.2 Testing For Auto Correlated Residuals  
5.7 Analysis and Findings  
5.7.1 Descriptive Statistics.  
5.7.2 Correlation.  
5.7.3 Model description.  
5.7.4 ANOVA tables  
5.7.5 Parameter Estimate  
5.8 Test for Normality using Histogram  
5.9 Cross check of the model  
5.10 Discussion and Outcomes.
Recommendation

Appendix A : Schedule for Information Collection 124
Appendix B :
  Table B1 Hospital Information 127
  Table B2 ICU Personal Charges 127
  Table B3 Treatment Procedure Charges 128
  Table B4 Laboratory Test and Diagnosis. 128
  Table B5 Laundry Services and Infrastructure 128
Appendix C :
  Table C1 General Characteristics and Cost Component of CNS Patient. 129
  Table C2 General Characteristics and Cost Component of CVS Patient. 131
  Table C3 General Characteristics and Cost Component of POISON Patient. 135
  Table C4 General Characteristics and Cost Component of RTA Patient. 139
  Table C5 General Characteristics and Cost Component of P/A Patient. 143
  Table C6 General Characteristics and Cost Component of HI Patient. 147
  Table C7 General Characteristics and Cost Component of OTHER Patient. 151
  Table C8 Medical device utility data. 155
