ACKNOWLEDGEMENT

Worries end where faith begins... In the journey called life, we come across many but few of them leave a strong impression on us. In the very outset, I feel overwhelmed to spell few such names that were the basic force behind this research work and their support let me go and accomplish this assignment.

First of all, I sincerely acknowledge my gratitude to Almighty GOD without whose blessings this would have never a success.

Although it is always difficult to translate the feelings of regards and reverence into reality, yet it is delectable when I execute my sense of profound gratitude to my mentors, Dr Sanjay Panwar, Associate Professor, Department of Physics, Maharishi Markandeshwar University (MMU), Mullana (Ambala) and Dr. Sunil Kumar, Research Professor, Quantum Functional Semiconductor Research Centre, Dongguk University, Seoul, South Korea. Their earned effort has given fullness to my modest endeavor. Diction seems inadequate to express my indebtedness and appreciation for their sagacious guidance at each step, unfailing interest, critical appreciation and moral inspiration. I hope my words of thanks will find a small place on their busy desk.

I am extremely thankful to Dr. Tarsem Kumar Garg, Chancellor and Dr. S G Damle, Vice Chancellor, MMU, Mullana (Ambala) by providing me an opportunity to carry out the work and Prof (Dr) J K Sharma, Director, M M Engg College, MMU, Mullana (Ambala) for his constant encouragement and sincere advice throughout this investigation.

I am thankful to Dr. (Mrs) Vandana Sharma, Head, Department of Physics, MMU, Mullana (Ambala) for her support and valuable suggestions. The continuous inspiration and constructive criticism by members of DRC Dr.SK Mahna, Dr. Sukhjeet Singh, and Dr. Anil Kumar are also gratefully acknowledged.

Extensive studies involving the use of Scanning Electron Microscopy (SEM) and X-ray Diffraction studies were conducted at Nanotechnology Centre, Delhi Technological University (DTU), Delhi. I shall fail in my duty if I do not make a special mention of the immense help I received from Dr. Amrish Panwar, Department of Physics, Delhi Technological University (DTU), Delhi. I am highly
thankful to Dr. C C Tripathi, Director UIET, Kurukshetra University, Kurukshetra, for his kind cooperation for conducting electrical characterization.

I would like to express my myriads of inexpressible thanks and immense gratefulness to Dr. R S Kanchi, Dr. (Mrs.) P Sengupta, (Ex. Principals Dyal Singh College, Karnal) and Dr. K L Gosain, Principal, Dyal Singh College, Karnal who motivated me to cover a long journey of this research work.

I am deeply indebted to Ms Heena, Ms Ambika, Ms Priya and Mr. Mandeep for their valuable suggestions, good wishes and cordial assistance in different phases of my research work.

I would also like to express my deep regards to Mr. Rajesh Arora, HOD, faculty members and the lab staff of Physics Deptt., Dyal Singh College, Karnal for their support. I thank all my friends, for having helped me affectionately from time to time.

I specially thank my loving brothers and sister for their unreserved help, personal caring, unending support and moral boosting. A sense of apology is due to my loving daughters Rupanshi and Nandini, who probably missed many precious moments of motherly love and care.

My husband Dr. Raman Seth deserves special thanks and grand appreciation for his persistent moral support and capability to rejuvenate me during the leaning phases of the work.

Blessings of my mother-in-law and my mother are duly acknowledged.

( RAJNI SETH )
