ACKNOWLEDGEMENT

The investigator owes a deep sense of gratitude and indebtedness to the supervising teacher Dr. Sivarajan K. for his inspiring guidance, valuable suggestions, constant encouragement and kind treatment throughout the course of the work.

The investigator expresses his gratitude towards Dr. C. Naseema, Head of the Department of Adult and Continuing Education & Extension Services, University of Calicut for all the valuable assistance provided during the study.

The investigator is deeply indebted to Dr. C.P. Sreekantan Nair, former Principal, Farook Training College, Calicut, for his kind directions and advice right from the beginning of this work. Without his valuable suggestions and assurances this study would have gone wayward.

The investigator is thankful to his teachers, Dr. K.S. George and Dr. T.K Mathew of Titus II Teachers’ College, Thiruvalla., who gave practical suggestions and emotional rapport at times when the researcher quite needed it.

The investigator extends his sincere gratitude to Prof. Abdusalam, former Principal, Farook Training College, Calicut, for all the valuable assistance, which he provided during the study. It was during one of those casual talks with him, much before taking up this research problem that the concept and relevance of Problem Solving Ability struck my mind and it was he who indirectly and unknowingly guided me towards this area of research.

Thanks are due to my colleagues and seniors at Farook Training College for their advice and good wishes, without which the work would not have progressed at times.

Also thanks are due to Shri. Unnikrishnan, Head Master, AKKR High School, Chelannur, for his kind sharing of thoughts, expertise and experience.
The real work behind this study was the development of the Problem Solving Ability Test in Physics, which demanded intellectual effort and time. Years of brooding over puzzling paradigms pertinent to the content portion could only be bloomed full by the careful supervision of the great teacher N. K. Gopalan, of Government High School, Oorkkatterry and with the final touches from Dr. Abdul Gafoor, my colleague at Farook Training College.

The investigator will always remember with gratitude, the support and cooperation of the Headmistress Mrs. Shantamma Mathew and staff of Government Ganapat Vocational Higher Secondary School, Feroke. The professional outlook and positive attitude of the teachers of this school had a deep impact upon me.

The investigator owes thanks to Prof. Fareed of the Department of Statistics of Farook College who helped me in analyzing the data. His professional outlook and expertise in the field helped to develop a gestalt view of the statistical aspects employed in this study. Also the investigator remembers fruitful discussions with Dr. Manikandan and Prof. Faziluddin that gave clarity and direction to my thoughts.

The investigator is thankful to Dr. Sumangala, V., Professor, Department of Education, University of Calicut and Dr. Sholy Joseph for giving permission to use the Verbal Intelligence Test based on the Triarchic Theory for the present research.

The investigator is also thankful to Dr. Sivarajan, K., and Dr. Subrahmanyadas for giving permission to use the Socio-Economic Status Scale for the present research.

The researcher is grateful to Dr. Abdul Gafoor, who was my colleague at Farook Training College, presently Reader in the Department of Education, University of Calicut, for his suggestions and guidelines at each and every stage of the study. His expertise and sharp thinking has helped me tackle many difficult situations, during the various phases of the research.

University of Calicut, Manoj Praveen, G.
