I have taken efforts in this dissertation. However, it would not have been possible without the kind support and help of many people. I would like to extend my sincere thanks to all of them.

First and above all, I am very grateful to God, the almighty for providing me this opportunity and competence to move forward successfully. There are several persons who directly or indirectly contributed in shaping up my academic research, however I would have never succeeded in completing my research without the co-operation, encouragement and enlightening guidance, I found in my illustrious Supervisor, Prof. Shahid Ahmed, Head, Department of Economics, Faculty of Social Sciences. I express my deepest gratitude towards him, for providing guidance and support throughout the academic research work. His direction and patience deserve a special reference.

I am really thankful to sir for helping in every step of my Ph.D. work. He helped me with the academic research and its every aspect at the micro level. The kind-hearted, appreciating and friendly nature that had been shown by him for the past six years will always be remembered. I remain immensely grateful for his able supervision through all the stages of my research.

I am also thankful to Jamia Milia Islamia University for consenting me to pursue the Academic research at Department of economics. All the faculties, staff and Fellow research scholars provided the positive environment for the academic research.
I would like to extend my thanks to management of Jaipuria Institute, Ghaziabad (former employer) for constant support and motivational encouragement in the initial phases of my research. It includes Mr. Nikhil Garg (Director), Mrs. Swati Jain (Asst. Professor) and Rachna Sharma (Asst. Professor).

I heartily acknowledge the endless support and best wishes from all the members of my family especially my mother in law Smt. Ganga Negi and my father in law Shri Umed Singh Negi who had always encouraged me, and have showered love and blessings immensely. I would also like to acknowledge the support and encouragement by my husband Mr. Bhupender Singh Negi and Son Yagya Negi who missed so much when I was busy in my research work. I would like to extend special thanks to my father Shri Virender Kumar Gupta who has been the constant source of inspiration for me since my childhood, my mother Smt. Urmila Gupta who supported me throughout and Sister Ms. Niharika Gupta, without whom probably I would not have been enrolled in Ph.D. Last but not the least I thank everyone who has contributed in this enlightening journey.

(Yamini Gupta)
