

ACKNOWLEDGMENTS

Surviving the dive through Ph.D. would not have been possible without the benefaction of all the great people who kept me going. Though words might not suffice, but I would express my heart filled thanks to all the people who were directly or indirectly associated with my journey of Ph.D.

It would be apposite to begin my acknowledgement by extending my immense gratitude to my research supervisor, Prof Sarita Gupta, Biochemistry Department for her constant guidance and encouragement. She not only introduced me to her research with utmost patience but also allowed me to add new branches to it. Through these years of my PhD, she has generously mentored, counselled and motivated me to do research. I would always be thankful to her for lifting my spirits during my failures. Her unique ways to carve the scientific aptitude by giving the freedom, support and efforts to make any idea work is, of course the key to this research thesis.

I am grateful to the Vice Chancellor, the Registrar and the Dean - Faculty of Science, The Maharaja Sayajirao University of Baroda for providing all necessary facilities to accomplish my doctoral studies.

My gratitude's to all the faculty members, Biochemistry Department who were always there to provide their valuable suggestions. I would thank Prof. CV Ramakrishnan, the Founder Head of our department, who never failed to encourage us during his yearly visits to India. I acknowledge Prof. G. Nareshkumar and Prof. R. Begum for their critical comments in my studies. I am obliged to Prof. C Ratnaprabha, Prof. Puspa Robin, Dr. J. Pohnerkar, Dr. S. Acharya, Dr. Devesh, Dr. Rajesh, Dr. Ravi and Dr. Sanjeev for extending their constant support during every technical, experimental as well as departmental issues. A very special thanks to Dr. Laxmipriya who have inculcated the basics of neurobiology and have always spared time from her busy schedule to critically evaluate my progress during my Ph.D. tenure.

I express my sincere thanks to Dr. Gitika, without whose backing, the initial days of my Ph.D. would have been very difficult. I have learnt a lot from her, starting from designing an experiment to its execution. I am thankful to Dr. Prakash Pillai, Faculty of Zoology Department, who helped me with several neurobiology techniques. My deep acknowledgements to Dr. Anil Pillai for developing my writing skills as well as for

resolving my scientific hitches. Lots of gratitude to Dr. Munjal, an alumnus of Biochemistry Department for helping me through my behavior studies.

I thank Dr. Sharad Gupta for all his scientific inputs throughout my studies. His support and suggestions have been instrumental for the initiation and success of the histological studies. Apart from scientific help, he always spared time for inviting us to their place to relish his specially prepared treats of barbeque.

The credit of smooth lab functioning goes to my lab seniors, Dr. Nidheesh, Ms. Anubha, Dr. Tushar, Dr. Akhilesh and Dr. Muskaan. My research would have been much tougher, if not, they have passed on their immense knowledge and meticulously established protocols. I am obligated to Dr. Tushar who has been mentoring me since my M.Sc. dissertation and it won't be wrong to say that I have learnt most of the things from him. I extend my genuine gratitude to Dr. Akhilesh for making the lab atmosphere amicable, and for all his scientific suggestions in research. My gratefulness to Dr. Muskaan for her throughout support in spite of her juggle between the personal life and research, and also for sharing her animal model with me.

I have been blessed to have the company of awesome colleagues – Abhay, Komal, Mitul, Gaurav and Gurprit. My sincere thanks to Abhay, who with utmost patience have tolerated my most annoying, at times impossible nature. He was always there to offer valuable remarks during scientific discussions. My heartfelt thanks to Komal, who always stood by my side, even in my odds. My experiments with FACS and confocal would never been easy without her immense support. I have always cherished her company as well as her guidance at scientific as well as social fronts. Thanks for caring. I extend my warm gratitude to the friendliest person of my lab – Mitul. At times, his patience level would leave me astonished. His ever-helping nature have been my lifeline during several critical situations. Special thanks to Gaurav, whom I have bothered the most during my thesis writing for technical help. He has been an affectionate brother with whom I could fight, reunite and share any of my moods. I am thankful to Gurprit, whose innocent and jolly nature rejuvenated the dull atmosphere of our lab. Her enthusiasm and curiosity made learning new things easier.

I am thankful for the efforts of the M.Sc. students: Sarmi, Nirali, Shreya, Richa and Aashka, who shared my research during their dissertation project and thus, with every passing student, I reached closer to the fulfilment of my objective. I express my gratitude to other

MSc students- Vyakhya, Jasmita, Kinjal, Abhishekh, Kishan, Deep, Hemal and Steffi for their co-operation. My heart full thanks to all the research scholars of our department for their every time support.

I am obliged to Pethe sir for acquainting me to the department as well as administrative protocols. I extend my gratitude to all non-teaching staff: Akshita ma'am, Manish bhai, Shailesh bhai, Ramesh bhai, Vyas bhai, Anil bhai and Balvant bhai.

I thank the Animal house staff: Rameshbhai, Vijaybhai and Narayanbhai, Biochemistry Department for always been helpful and making timely availability of animals for experiments.

I am sincerely thankful to Dr. Vikram Sarabhai Institute of Cell and Molecular Biology, Faculty of Science for providing the access to high throughput instrumentation facility. I would always be grateful to its staff: Pooja Ma'am, Heena, Prateek, Sucheta, Pradeep, Manojbhai and Harsh for helping me with instrumentation and data analysis.

Doing science would be impossible without the collaborative help. I am thankful to Dr. Jatin and Prof. M.R. Yadav from Pharmacy department for providing their expertise in my research. I also express my thanks to Prof. G. Archana and Prof. T. Bagchi from Microbiology Department for the instrumentation support. I also extend my special thanks to staff of Physics Workshop for constructing the setups for behavior studies.

I am extremely thankful to non-teaching staff: Kaushik Sir, Kenith Sir, Milind Sir, Mayur Sir and Nitish Sir from Faculty of Science and University for their support in administrative formalities.

I am very grateful to Prof. Datta Madamvar, B.R.D. School of Biosciences for guiding me since my M.Sc. days, and also for introducing me to Prof. Sarita Gupta. He is the one who have oriented me towards doing research. I will always be indebted to all the faculties of Microbiology Department of V.P. and R.P.T.P. Science college for nurturing the curiosity for science in me.

I am immensely grateful to Department of Science and Technology for the fellowship and contingency received under DST INSPIRE fellowship. I am also grateful to DBT-MSUB-ILSPARE and UGC for giving financial assistance for the research.

My Baroda stay during Ph.D. would have been difficult if I did not have a great friend circle to stick to. Aejal, thanks a lot for constantly motivating, inspiring and helping me at any hour of the day. Your home was my rescue during my worst days. I am very thankful to Zalak and Ashutosh – My Tea-mates, with whom I enjoyed my spare time discussing science. If not they, it would have been very tough to reach this complete line. I thank Parth, Ankita and Nitin Swami for being there for me during their tenure in the lab as well as afterwards. My friend in needs and in deeds - Nikunj, Namrata, Hinal, Harshil, and the newest member Himani, thanks for all your care and support. My besties - Soumyadi, Sapna, Mansi, Niyatidi, Hemanti, Neha, Ruchi and Janki will always hold special place in my heart for making my life so stress free. Special thanks to Devila aunty and Dinesh uncle for never making me feel homesick.

Needless to say, the hopes and support by my family has been the driving force which made me complete this journey successfully. My role model- Papa and my loving sister are the pillars for my accomplishment. Special thanks to Mummy for patiently coping and continuously encouraging me. I missed her and my loving brother dearly during my times away from home.

My apologies to those whom I might have missed inadvertently, but I am thankful to every individual who provided me the smallest support to reach this stage.

Ragitha Chruvattil.
