ACKNOWLEDGEMENTS

I am immensely indebted to my supervisor Prof. P.S. Ramakrishnan whose guidance, high expectations and timely interventions pulled me along uncharted waters in completing this work. But more than this, what I owe to him is a focus and a direction that he gave to my thought, something which is of immense value in facing the vicissitudes of life. I am positive that the lessons I have learnt will always be a blessing to me.

To Prof. K.G. Saxena, whose advice and focus for time management helped me in completion of this work. In Dr. R.K. Maikhuri and Dr. Tunira Bhaddauria, I found a ‘friend and guide’. Their timely suggestions and constant encouragement was instrumental in providing impetus to my work. I am thankful to Prof. V. Rajamani, Prof. J. Subba Rao and Prof. D.K. Banerjee, the successive Deans of SES for providing the infrastructural support of the school to carry out my experiments. I gratefully acknowledge the institutional facility extended by the Director G.B. Pant Institute of Himalayan Environment and Development.

I am grateful to Dr. R. L. Semwal and Dr. K. K. Sen who took keen interest in my study, encouraged me warmly and provided help whenever I required. I thank Dr. J.M. Julka, Zoological Survey of India for his help in identifying earthworm species and Prof. Gaur, Garhwal University for his help in identifying plant species.

My heartfelt gratitude also goes to my friends Sidhu, Nilay, Sunny, Dubey, Mall, B.K. Jha and Raja who provided the much-needed support, during the period of hard work. I can not forget to remember their company at the Dhabas and different moments shared with them at JNU. A special mention has to be made of my close friends and lab mates Abdul Wakeel and Kritika Singh who have been great friends as well as critique. I appreciate my lab mates Madan Koirala, Chandrasekhar, Gavali for their help. My Special thanks are due to Capt. R.S. Kharola and Rakesh for their constant encouragement and hospitality. I am thankful to Rita and Richa for their cooperation during the course of my research work. I also extend my thanks to Vikram and Dayal for their help. I must mention the assistance to the lab work provided by Dinesh and Puran. My thanks are also due to countless other friends and well wishers, acknowledging whom would make a long list.

It is indeed, a great pleasure to acknowledge the support, co-operation and hospitality extended by people of Jasholi and Kodima village, particularly by Chauhanji, Jungleji, Guddu bhai, Madan Chamoli, Pandiji, who made my stay at Jasholi a memorable experience. Logistic support at Srinagar by Dr. Sunil Nautiyal and assistance from Mahendra, Harish, Umesh, during my field-work is duly acknowledged.

Words fall short in expressing my gratitude to my parents and family members for their unconditional love, care and support, which sustained and nurtured during trying times. Their relentless faith in my ability was a great source of inspiration throughout. My brother, Dheeraj deserves special mention for the financial security that he guaranteed during my lean periods.

I am thankful to University Grants Commission (UGC) for financial support to conduct the research work.

However, I am entirely responsible for any mistake or drawback in the study.

(Dhaskar Sinha)
